THE CHARLEROI MAIL

VOLUME XXI—NO. 56 CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA, TUESDAY, AUGUST 10, 1920 TWO CENTS

PAYROLL BANDITS WILL ENTER A PLEA OF GUILTY IN COURT

Have Made Confession Telling Of Parts They Took In Robbery

GOOD WORK OF DETECTIVES

According to statements made within the past few days Julius Howauski, alias Julius Carzone, Alex Trusavich and Phillip Davidack, the three men arrested in connection with the robbery of the paymaster of the Vesta Coal company at the Richeyville shaft on the 13th of June, intend to enter a plea of guilty before the Washington county court.

This decision on the part of the robbers now brings out for the first time the true story of the manner in which these men were arrested and the evidence secured against them by County Detectives John Weiner and Bert Laird. It was through the efforts of these two officials that the information was secured that led to the arrest of Trusavics and Davidack at Gary, Indiana, after Howauski had been apprehended as he was attempting to escape from the mine on the day of the holdup.

The three men named above were concerned in the holdup, robbing the paymaster of $7,000, and leaving the paymaster and mine foreman in the mine after apparently tying them securely with ropes. However these two officials secured their release in about 15 minutes, when they spread the alarm. Howauski was arrested as he left the mine, but the other two men escaped.

The county detectives, who had been sent to the scene as soon as the district attorney was advised of it, and they immediately took charge of Howauski and after a gruelling examination Detective Weiner secured valuable information which led to the arrest of the other two men. The officers found where the two men boarded, which they at once visited, but found the men had gone. After a close examination of the boarding boss and his wife the detectives secured the address of the men in Cabot Way, Pittsburg. They also learned that one of the men had a brother living in Gary, Ind., and it was believed they might go to that place.

The next day Detectives Laird and Weiner secured a complete confession from Howouski, who admitted he had taken part in the holdup and that he shared in the money. This money was later recovered by the officers. In the meantime officers at Gary, Ind., were advised to arrest Trusavich and Davidack, if they appeared in that city. A few days later these men were arrested and brought to Pittsburg and later turned over to the Washington county officials. They have since confessed, and will make a formal plea before court, after which they will be sentenced.

CRANE REPAIRED AND PUT IN COMMISSION

The Donora steel works has repaired the crane damaged in the storm of Saturday evening, July 31, and placed it back in commission. The other crane, which was wrecked by the windstorm, will be a total loss and will have to be removed from the ore pit, where it now lies. The bridge structure forming the track for the cranes, was only slightly damaged in the wreck, and has been put back in normal shape. The use of the one crane will permit the blast furnaces to continue operation, although the single machine will likely have to work double turn.

NEW REGULATIONS AT DONORA BRIDGE

County Commissioners Johnston and Ecker, in company with Commissioners Deeds, Boyd and Reamer of Westmoreland county, met at Donora on Friday last and looked over the work on the river bridge at that place, recently completed by the Ferris Engineering company. The commissioners expressed themselves as being satisfied over the manner in which the contract was carried out and accepted the work from the contractors.

At this same meeting the commissioners adopted certain regulations as to speed of autos and weight of loads going over the bridge fixing the speed limit at eight miles an hour, and directing that all loads must conform to the law. John O. Watson has been retained to enforce these regulations and will be on duty at the bridge every day to see that the orders of the commissioners are enforced.

PILFERED VEGETABLES; PAID DAMAGES AND COSTS

On information made by William Baker of Lock Four, three boys were brought before Justice Nutt yesterday afternoon, on a charge of taking vegetables not only from the garden of Mr. Baker, but from others, and were peddling them about town. Garden owners had noted for some time that their gardens were being tampered with, and a watch placed yesterday afternoon discovered the boys in the Baker garden. The fathers of the boys were summoned, and a compromise reached before the justice in which the boys paid damages and costs to the amout of $6.80 each.

I will collect that rent, positively in advance and guarantee no vacancies. Clyde B. Cope, Real Estate and Insurance. 315 McKean avenue. 21-tf

Meeting Aug. 11 at 7:30 p. m. in High School Gymnasium.

By order of Scoutmaster.

No Arrests Made For The California Dynamite Outrage

No arrests have been made nor is there any clue to the perpetrator of the dynamite outrage, which occurred in the office of the California Sentinel at 1:45 o'clock Monday morning. Bloodhounds were used Monday forenoon in an effort to locate the guilty parties, but so far no arrests have been made. The dogs took the scent twice, which they followed both times to the home of a foreigner. The man of the house was not at home at the time, and had not returned last night.

The Sentinel plant will be discommoded for a time, but Editor Lamb says he will secure and install a new press at the earliest possible moment. In the meantime he will depend on nearby offices to print his paper, more than likely using the equipment of the Brownsville Telegraph for that purpose.

Hundreds of people visited the scene of the explosion on Monday. As news of the crime gained circulation people came from many sections to ascertain the extent of the explosion. The blast early in the morning aroused the town and many flocked to the scene at once. It appears to be the opinion of the citizens of the California community that the outrage was the result of the attacks being made by the Sentinel on bootleggers and other whiskey dispensers in that section, as well as its stand against Sunday desecration which the paper had boldly stated was going on without interference on the part of the officers of the community.

CLAIMS COMMISSION ON SALE OF COAL

Tom P. Sloan of North Charleroi, is plaintiff in a suit against Charles Miller of Beallsville for $18,500, which Mr. Sloan alleges is due his commission in the sale of coal property owned by Mr. Miller. The plaintiff avers that this coal, situated in West Pike Run township, was sold through his securing a purchaser. It was sold to J. M. Hillman, Jr., at approximately $270,000 or at the rate of $925 per acre.

Mr. Sloan says he was not a real estate broker at the time but that he undertook the sale of this coal under an expressed verbal agreement with Mr. Miller that he would pay him, the plaintiff, a reasonable commission. A fair and reasonable commission, Mr. Sloan says, is five per cent, which he claims.

FROM CHARLEROI, PA., TO CHARLEROI, BELGIUM

An order of court has been made authorizing the guardian of Amelia Derly, a minor, aged 11 years, to pay the sum of $112 as traveling expense back to Paris, France. Both of the child's parents are dead, and she is returning to her grandmother at Paris. She will be taken from Charleroi, Pa., to Charleroi, Belgium, by Mr. and Mrs. Evaris Louis, who will sail shortly from New York. The Monongahela City Trust Company has been appointed guardian.

According to the Brownsville Telegraph thousands of dollars worth of automobile tires and fixtures have been stolen from cars in the South Brownsville yards. In many instances practically everything detachable is taken, the removal of which show that thieves were in no hurry, for in one instance a radiator as taken.

WAGON MINE OWNERS PREPARE FOR ACTION

A meeting of the wagon mine coal operators between Elizabeth and Brownsville was held at the office of D. M. McCloskey, Esq. Monday evening for the purpose of taking some action with reference to a recent order issued by the railroads. By the terms of this order, issued by the superintendent of transportation, no cars will be alloted to wagon mine operators, at least for the time being, and as a consequence their mines and teams and trucks at the present time are practically idle. The order was issued on Monday, August 2, since which time no cars have been placed on sidings for these mines. Cars on the sidings at that time were loaded out, but these operations have been idle since.

At the meeting last night, at which about forty representatives were present, preliminary steps were taken to arrange for a hearing before the Public Service Commission at Harrisburg, in order to have the order rescinded, and also to secure the necessary evidence to bring suits for damages against the railroads. Another meeting is to be held at the same place on Wednesday evening, at which time it is anticipated that about one hundred representatives will be on hand to take part in the proceedings.

FOURTH GAME OF BASE BALL SERIES

The Charleroi McIlvaines will hook up with the Page Steel and Wire team at Electric Park, Monessen, Wednesday evening, in the fourth game of the series now on between the two teams. The games now stands two to one in favor of Page and if Monessen wins tomorrow evening it will close the series. The locals will try and even up the score.

CHAIRMAN NAMES EXECUTIVE COMMITTEE FOR THE CAMPAIGN

COMMUTATION TICKETS GOOD FOR TIME LIMIT

The railroad officials of the country have submitted to the Interstate Commerce Commission certain propositions with reference to the disposition of certain tickets after the new passenger rates become effective on the 26th of this month. With reference to commutation tickets it is proposed that they, as well as other multiple forms of tickets bearing calendar month limit or limit not exceeding 35 days from date of sale, sold on or before August 1, 1920, will be honored within their limits.

SUPERVISORS ORDERED TO REPAIR HIGHWAYS

Upon a return made by Constable Glen VanVoorhis of Fallowfield township, to the court at Washington on Monday, when the quarterly returns of constables were made, to the effect that certain roads in his baliwick were impassible, the court made an order on the supervisors directing immediate repair of the highway complained of. The order is directed against Earl Beazell, Neal Daugherty and Hugh Crow, supervisors, and they are ordered forthwith to repair the roads in question and put them in good condition for travel, or appear in court on Thursday, August 12 at 10 o'clock to show cause why the district attorney should not present to the grand jury a bill of indictment against them for neglect of duty and maintaining a public nuisance. The roads in question are the road leading from Bentleyville and intersecting a road at Redd's Mill, and the public road near Lovett's post office.

WRECK TIES UP LAKE ERIE TRAFFIC

Traffic on the Lake Erie railroad was tied up in the Monessen yards late Thursday afternoon for a few hours as the result of a freight train crashing into a wrecking engine which was engaged at the time in cleaning up a wreck that had occurred only a short time before. The big crane of the wreckage engine was swung across the track, when the freight, traveling at a high rate of speed, approached. It is claimed a flagman did not go out from the wrecking train far enough and that the freight could not stop in time to prevent the accident. When the engineer and firemen on the freight saw that a collision was inevitable, they both jumped from the engine after the steam had been shut off. Both engines were derailed by the impact and it was necessary to send to Glassport for another wrecking crew in order to clear the tracks.

C. J. Mogan Is Selected As Charleroi's Representative By Carothers

PRESS COMMITTEE SELECTED

Chairman C. S. Carothers of the Republican County Committee, has announced the following appointments to serve for the coming campaign:

Secretary of County Committee—Warren S. Burchinal.

Executive Committee—Chairman, Dr. W. L. Dodd, Amity; C. J. Mogan, Charleroi; John F. Curran, Washington; Harry Adamson, Ventalburg; T. J. Martin, West Brownsville; D. C. Parkinson, Dr. G. K. Hays, Monongahela; J. F. Clark, Washington; Gilbert E. Koedel, Donora; John J. Zwiek, Finleyville; Dr. W. S. Clark, Burgettstown; Earl S. Caldwell, Hanlin Station; J. Boyd Crumrine, Washington; Olan Yarnell, California; Seth Thomas, Roscoe; Chas. G. Schade, Canonsburg; W. F. Berger, Canonsburg; R. G. Jeffrey, Rea; A. M. Gardner, Avella; A. W. Clemens, Crafters; J. W. Hogue, Ellsworth; John F. Carmichael, Washington; George S. Hornbake, North Charleroi; William Fulton, Dunns Station; John W. Beeler, Donora; Frank Sibell, McDonald.

Press Committee—John L. Stewart, Washington; William H. Watson, Donora; Lloyd E. Flint, Monongahela; H. L. Lamb, California; L. E. Hileman, Fredericktown; W. H. Young, McDonald.

Mr. Carother hopes to announce the personnel of the other committees that will have charge of various departments of campaign work within a short time; he will appoint a finance committee, a speaker's committee and a Harding campaign committeem.

Warren S. Burchinal, who is the new secretary of the county committee, is a world war veteran and one of the active young Republicans of Washington. He is first assistant district attorney in the office of District Attorney Cummins and is one of the popular members of the Washington county bar.

MR. CLARK FORWARDS SCOTTISH NEWSPAPER

The Mail is in receipt of a copy of the Aberdeen Free Press of Aberdeen Scotland, forwarded by W. C. Clark now sojourning in that part of the Highlands of Scotland. The paper is dated July 21, and is a special Highland show section, devoted to the interests of the Horse and Cattle Show which was being held there at the time. Scotland is famous for its shorthorn cattle as well as Clydesdale horses and both of them bring high prices at the sales held yearly at Aberdeen. In the copy forwarded to The Mail note is made of the sale of a Shorthorn bull for the sum of twelve thousand pounds, equivalent at present to about $40,000 in United States money.

WAR "MYSTERY" MADE CLEAR

Men on the Leviathan Now Understand How Their Officers Detected Them in Smoking.

Men who sailed on the Leviathan when she was being used as a transport will learn with interest the explanation of a "mystery" of the giant liner in those war days, a mystery which has been the subject of many a midnight conference in the lee of the deckhouse. Only recently a former officer of the Leviathan told the story. It appears that several of the crew sought a lower hold far from the haunts of the officers on duty and there, believing themselves carefully concealed, they smoked to their hearts' content. But the ship had a fire detection system consisting of a series of pipes to the holds, through which a suction fan is continually drawing air samples to the wheelhouse. Thus the officer on duty there noticed the curling wisps of smoke coming out of the pipe from one of the lower holds. Sniffing the smoke he detected the old familiar odor of tobacco.

It was an easy matter to hurry down and catch the men in the act and start them on a round of extra duty, which cured them of smoking aboard ship. They were puzzled to know how the officer had traced them. The hold was way down near the keel, far from the wheelhouse and there had not been another man within many yards of their position. They knew no officer had followed them and they took it for granted that there was no direct connection between the hold and the wheelhouse. And no one enlightened them during many trips to France.—New York Evening Post.

SERVED IN ORIENTAL STYLE

Magnificent Banquet Given by King Hussein of the Hedjaz to Lord Allenby.

A banquet given by King Hussein of the Hedjaz to Lord Allenby, the British high commissioner, as described by an Arab correspondent of the London Times on March 2, was a striking example of oriental magnificence. After preliminary visits and military reviews, in which the Bedouin cavalry dashed by at full speed, firing their rifles, the banquet was held in true Arab style in the municipality buildings at Jeddah.

On the table, which was eighteen feet broad by thirty feet in length, barefooted waiters dressed in rich Arab costume walked about helping the guests, 70 in number, to slices of the joints of roasted half sheep stuffed with almonds, rice and spices. Each guest had three or four plates, and was surrounded by some 20 or 30 dishes of salads, fish, roasted chickens, pilaff of mutton and sweets of all descriptions. The king's band of musicians played throughout the banquet.

At the end of the feast the king's servants handed round silver basins with ewers of scented water for the guests to wash their hands in. Coffee was served in another room while guests of a lower degree sat down at the banqueting table. The remnants of the feast, which were considerable, were distributed among the inhabitants of Jeddah and the crews of the British ships at anchor in the harbor.—Current History.

The House Famine.

Morris Hillquit was discussing in Albany the ludicrous profiteering on rents which so many New York landlords have been practicing.

"And despite this profiteering," he said, "houses and apartments are in greater demand than ever. Well-heeled tenants have their bells rung two or three times a day by total strangers who anxiously inquire if by any chance they think of leaving soon.

"I heard of a chap who entered a newspaper office recently and said to the girl behind the counter:

"'I want to advertise in your paper for a house.'

"'Yes. How many insertions?' said the girl briskly. 'We make a reduction for space taken by the year, and we have a very reasonable three-year contract that would probably suit you better still.'"

The windmill has not been generally found available for the generation of electricity because of the irregularity of the air currents, but this has been overcome by a Swedish inventor. Instead of being directly connected to the dynamo in the usual manner, the mill-wheel shaft is geared to a hoisting device, which serves to elevate a two-ton weight to the top of a 75-foot steel and wood tower. When the weight reaches the maximum height, it is released, and, as it falls, actuates the dynamo, which is mounted on a bracket at the apex of the tower with the mill wheel. A storage battery and switchboard are housed in the lower portion of the tower.

Just Like an Apple to Marjorie.

Little Marjorie, who is three, told her mother, the wife of a Muncie manufacturer, the other evening, that while the mother was uptown shopping she had been taken by a servant to call on her father in the latter's office.

"What time did you go?" asked the mother.

"Oh, in the core of the afternoon," replied the little girl.

"Mother doesn't understand what you mean by the 'core' of the afternoon." It was explained to Marjorie.

"Why, I mean the middle," she said simply, as wondering at the ignorance of grown folks.—Indianapolis News.

Queer Treatment of Infants.

Many are the queer remedies applied to the Greek baby when he is ill. The workings of the medicine man of our American Indians is not more fantastic. A bed of cold cinders is very generally used as a last resort. When the baby is almost beyond hope the cradle is filled with old ashes and the tiny tot is buried in them. The welfare nurse who told the writer this was never able to discover what the benefit to be derived was supposed to be. Had the ashes been warm we would have explained the custom as a primitive form of creating artificial heat. Among the gipsies who wander over Greece progress, for the present, is absolutely hopeless. It will take years of preparation and education to enable them merely to begin to understand the idea of social betterment. For the moment "Kismet" and "Allah wills it" rule their lives and kill all initiative.

China's Potential Wealth.

All the crops known to the north temperate zone are found in abundance in China. Emphasis is given to the rice crop, which forms the chief article of food for the nation. In many of the valleys are found vast beds of clay of excellent quality for the manufacture of pottery. The extent and value of China's clay is not yet realized by the world. For centuries the nation itself has been known in the western world, largely because of the excellence of its pottery. Added to these sources of wealth is the unrealized water power of China. The rivers, breaking through successive ranges of mountains, have in places attained a velocity sufficient to turn millions of spindles and to charge electric batteries with force sufficient to drive the modern engines of commerce with a velocity and power beyond all reckoning.

The Integrated Goat.

The story of the Integrated Goat concerns the man who had a lawn to cut and no lawnmower. He was too poor to buy a lawnmower and he hated the labor of mowing, so he kept a goat. The goat saved him the labor by eating the grass, produced [illegible] and milk for the baby, fertilized the lawn and also a few tin cans on the side. That is a notable case of integrated effort. We pay tribute to the wisdom of this sort of effort in our popular proverb, "killing two birds with one stone." It's also a simple figure. Real scientific effort would produce a machine that will kill two birds with one stone and bring the stone back.—From the Nation's Business.

Bacon's Rebellion in 1673.

In 1675, on April 23, Bacon's rebellion began. The colonists of Virginia were being constantly harassed by the hostile Indian bands, who descended on their settlements to plunder and kill. The people asked Gov. Berkeley to allow them to form a guard led by Nathaniel Bacon, a young planter, for the defense of their homes. Berkeley refused, calling the request a presumption on the part of the common people. In defiance of the governor's order, the volunteers set out under Bacon against the Indians. Bacon was declared a traitor and ordered to be executed for his insubordination, but he fell ill of a fever and died during the expedition.

Wattle Plantations.

It is a strange fact that Australia, the home of the wattle (acacia), should import nearly £50,000 worth of wattle bark in one year, and that the chief exporter of the bark to the commonwealth should be South Africa—the country which began its wattle plantations with trees imported from Australia. Cheap labor in Natal, enabling the stripping of bark at one-seventh the cost in Australia, and the need for expensive wire fences in the latter country, probably account for the anomaly. It is worth noting, however, that Victoria has 21,000 acres of black wattle in one of her state forests, and other large areas will be sown shortly.

What Is Civilization?

"It's all in the point of view," is true of a good many things, and one of those may be the question, "What is civilization?" As late as the seventeenth century the highbrows of England were yet to be astonished by the advent of the fork. It was introduced by Thomas Coryate, the famous wanderer and writer, who said of it in his "Crudities": "The Italians cannot by any means endure to have their flesh touched with fingers, seeing that all men's fingers are not alike clean." For this he was long ridiculed. They called him the man who "used a fork at feeding."

Motor Cop Hides in Boiler.

In one week 202 speeding motorists on Mission road at Los Angeles, Cal., were arrested by a motorcycle policeman who apparently materialized out of thin air. His well-chosen hiding place was a big abandoned boiler in a vacant lot, which afforded sufficient room for the machine as well as its rider.—Popular Mechanics Magazine.

Thinking of Prices.

The Parson—"And you say your wife was thinking of women's hats all the time she was at church, Sunday?" The Deacon—"I'm afraid she was, parson." "I'm so sorry. Her mind should have been on higher things." "Great guns! Parson! Are there any higher things than women's hats!"

It has been found that every part of the sunflower plant may be utilized for some economic purpose. The leaves form a cattle food and the stems contain fiber which may be used successfully in making paper. The pith of the sunflower stalk is the lightest substance known; its specific gravity is 0.028, while that of elder is 0.66 and cork 0.24. The discovery of the extreme lightness of the pith of the stalk has essentially increased the commercial value of the plant. This light cellular substance is now carefully removed from the stalks and applied to many important uses. One of its chief uses is the making of life-saving appliances.

Snakes Put End to Plague.

In the year 293 B. C., Rome being ravaged by the plague, the Tribune Quintus Ogulgius went to Epidaurus at the head of a commission to ask the priest-physicians of the famous Asklepion temple what should be done to check the pestilence that was devastating the city. They brought back with them rat-eating snakes, and these soon put an end to the disease. After a time the snakes died out, but the people long continued to paint their effigies on the walls of the Lararium in token of gratitude and paid them the tribute due to protecting household gods.

Fine Measurement for Sound.

Sound, though seemingly a very definite manifestation of activity, is peculiar among physical phenomena for its lack of units or means of measurements. An American physicist has finally arrived at a method of expressing values in watts, making absolute measurements with new and rather complex apparatus. A standard source of sound called a "phone" is made adjustable in tone by changing the volume of the reasonator and the tension of wires supporting a mica diaphragm.—Popular Mechanics Magazine.

Musical Prodigies.

Most musical prodigies are boys in spite of the law that girls develop mentally faster than boys. Girl prodigies on the violin are almost unknown. Very few of the great divas have been known as child wonders although there is a mesmeric method by which young girls can be taught to sing in imitation of great artists.

Pastoral Epistles.

The pastoral epistles are a group in the collection of New Testament letters which in their several addresses claim to have been written by the Apostle Paul. They differ from his other writings in being specific charges concerning pastoral care of certain fields, and comprise First Timothy, Second Timothy and Titus.

Painful Sensations

in the muscles, "neuralgic", soreness, aching back, pimples, boils, rashes and other eruptions, usually result from self-poisoning by products of imperfectly digested or non-eliminated food.

BEECHAM'S PILLS

help to restore activity of liver, bowels, kidneys, and skin, and so counteract cause and relieve symptoms.

TURNING AWAY FROM MEAT

In New York Big Hotels Meals Entirely of Vegetables Are Increasing in Popularity.

According to the New York Times the diners of the American metropolis are becoming vegetarians. Approximately one-seventh to one-fifth of the guests at the hotels here today are ordering vegetables for their meals instead of meats. All of the big hotels keep a very careful record of the sales of the different items on the menus for each day, and a recapitulation made recently at the Hotel Pennsylvania revealed that a surprising percentage of patrons omitted meat items entirely in their lunch and dinner orders. While the percentage for lunch was much higher than that for dinner, the number of dinner guests who refrained from meat entirely was also very large.

In the opinion of Chef Julien Jacquier of the Pennsylvania this is the result of years of emphasis on the value of vegetarianism. The vegetarian, a few years ago, was very generally the butt of the comic papers; but with the war a great deal more came to be thought of him by people who found that a thoroughly satisfactory meal could be made from vegetables and at much less cost. Chef Jacquier believes that this is responsible for the many calls given nowadays in the big hotels for vegetable luncheons and dinners, which have a special place on the menus.

ANCIENT LAWS OF INTEREST

Oldest Known Written Code Has Recently Been Translated by Eminent French Scientist.

What is said to be the oldest known written code of laws in the world, probably antedating that of Hammurabi by at least 1,000 years, has been discovered in part among the hitherto untranslated clay tablets from Nippur at the University of Pennsylvania museum.

The Hammurabi code was prepared about 2100 B. C., and was discovered about 20 years ago on a large diorite stone by French explorers.

The laws, just translated by Abbe Scheil of Paris, deal with responsibilities of hired servants, rentals, rights of slave women who have borne children to their masters, punishment for adultery, etc.

One interesting statute provides that rentals must run for three years in case a man has taken over a house the owner does not know how to manage. This is somewhat obscure and may mean that all rentals were for that term. In any event property could not be idle or be improperly used.

In case a slave bore children to her master she and the offspring were free, and if the master married the slave the children became legitimate.

Indian Is Model Soldier.

Accusations that he was a German spy caused Odis Leador, Choctaw Indian, to be made a hero and incidentally to be chosen as a model American soldier for a portrait made to hang upon the walls of the French Federal building.

Leador, in war days a foreman on a ranch near Calvin, Okla., learned from idle rumor in his neighborhood that he was accused of being a German spy. He immediately enlisted and in the course of a brilliant war record was cited for bravery. During the engagement for which he was cited he captured two machine guns and 18 prisoners, manning a machine gun for three days after the remainder of his crew had been killed. Dowarreux, the French artist, picked upon Leador as his ideal of a typical American soldier and made a painting from him which now graces the walls of the French Federal building.

Twice wounded and twice gassed, Leador has been doing vocational work and only recently brought home his bride to McAlester from Oklahoma City.—Wichita Beacon.

The Africa, which was launched at Copenhagen, Denmark, Dec. 11, 1919, by the East Asiatic company, is said to be the largest motor ship in the world. Her dimensions are: Length over all, 464 feet 6 inches; beam on frames, 60 feet; depth from awning deck, 42 feet; displacement, 18,600 tons, deadweight, 13,250 tons. Her main engines are two six-cylinder, four-stroke cycle motors of ordinary type. Each engine develops 2,250 indicated horse-power at 115 revolutions per minute. The diameter and stroke of the cylinders are 740 millimeters and 1,150 millimeters respectively.

Women Expert Life Savers.

One man at least chooses woman life savers in preference to men for patrolling his beach. That is Mr. Gray, manager of the parks pools in St. Louis, Mo. According to Col. W. E. Longfellow, life saving expert of the Red Cross, Mr. Gray declares that since trying women at this job during the war when the bronzed heroes were abroad, he would rather have them than men. Many women are now qualifying as life savers and are getting the training for their tests in the Y. W. C. A. and school pools throughout the country.

Gifted Imagination.

"Mrs. Ayres has great gifts of imagination, hasn't she."

"I don't know. Why do you think so?"

"I heard her speaking of the flat they live in as 'our town house.'"—Boston Transcript.

Lower California Pearls.

La Paz is the seat of the pearl fishing industry of Lower California. The annual output is valued at $250,000 and is promptly marketed in European marts. The Gulf of California has been partitioned off into four pearl regions which are fished successive years in rotation. The fishing is done from the months of May to October. The pearls are of good average quality and are obtained by Indian divers provided with modern apparatus. Practically all the black pearls in the world come from Lower California. In the Sixteenth century a Spanish soldier, Martel Cota, found a pearl the size of a pigeon's egg and sold it to the queen of Spain for 20,000 pesos. In 1917 [illegible] was found that sold for $17,000.

Paying on the Nail.

An expression with which everyone is familiar "paying on the nail," comes from the old method of settling accounts. In the early days of trade and commerce, merchants paid their debts by counting out their gold on to a copper "nail" or rail, in the market place. Written receipts are now almost universal and these rails are no longer used; but two splendid specimens still remain among the most interesting treasures of the ancient port of Bristol, England. They are each about four feet high, shaped like a gigantic hour glass. There they stand in the busy street, a lasting monument to the integrity of the old trading and merchant class who paid on the nail and scorned a receipt.

"Bungalow" Really "Bengalese."

The English word "bungalow" comes from the Hindu word "bangla," which really means Bengalese, but which refers to a Bengalese thatched hut. The British officers in India, being unable in out-of-the-way stations to obtain lumber, frequently built their houses of bamboo. The original form of the bangla or bungalow consisted of a large and lofty room with double walls of bamboo, with canvas partitions to form the bathroom, storeroom and bedroom and having a wide porch surrounding the bangla. The bungalow has been modified in this country until its Bengalese ancestor, the one-storied, single-roomed, porch-surrounded bangla would not recognize its American descendant.

Lover of Books Fortunate.

One great benefit of a taste for reading and of access to the book world is the service it renders as a diversion and a solace. What a great thing to be able to get away from ourselves, to fly away from the harassing, humiliating, discouraging, depressing things about us, to go at will to a world of beauty and gladness! The lover of good books can never be very lonely; and no matter where he is he can always find pleasant and profitable occupation and the best of society. A book may be a perpetual companion. Friends come and go, but the books may beguile all experiences and enchant all hours.—Orison Swett Marden, in Chicago Daily News.

Beautiful Roman Fountain.

The Piazza di Treve in Rome is so revered by the natives that they have always had a saying, "He who drinks of its waters will again come to Rome." The fountain occupies as much space as many a temple, filling as it does the entire open space of the square. Its lofty columns, high entablatures and great arched niches in which stand various mythological figures, are its crowning features. In the central niche is a colossal Neptune and below him are sea horses over which pour and splash in many streams a river of water from one basin to another, finally spreading out in a broad expanse like a lake.

Resourceful, and Won.

A young man from our town had gone into a training school as an automobile mechanic. In one of their tests an automobile was taken apart and it was his duty to assemble each part to its respective place. He had done this with the exception of one piece, which was missing, and which he could not find. C., commanding officer, told this young fellow that it was up to him to get this piece, so, taking his superior officer at his word, he proceeded to take the missing part from the commanding officer's own car, and he was one of four out of a class of 100 who passed the test.—H. H., in San Francisco Chronicle.

Compensation voted the lord mayor of London is not a salary in reality, it is merely an allowance in aid of entertainment, the Manchester Guardian explains. Lord mayors often spend double the amount allowed them. In the case of ambassadors, the entertainment bills are much higher than those of the lord mayors. It is up to every ambassador to see that he is not outshone in this respect by any other embassy. When Lord Granville was sent to the coronation of Czar Alexander he received an entertainment fund of about $50,000—and he spent more.

The Story of Confucius.

Confucius was born in the year 551 B. C. His father was a distinguished soldier and was 70 years old when his great son was born. During the whole of his life China was in a condition of turmoil. The feudal system had broken up centuries before it broke up as a failure.—Boston Transcript.

Weather Indications.

The following is given in the Boston Globe as means of foretelling the weather: "A gray, lowering sunset, or one where the sky is green or yellowish green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain. A halo occurring after the weather indicates a storm. A corona growing smaller indicates [illegible] growing larger, fair weather. A morning rainbow is considered a sign of rain; an evening rainbow of fair weather. A [illegible] of the sky, even when seen through the clouds, indicates fair weather; a coral [illegible], an approach of rain. Dark indicate settled weather. A [illegible] usually [illegible]. Unusual [illegible] of objects, especial [illegible] preceding of the storm [illegible] the first frost and the last frost were usually preceded by temperature very much above normal.

Lace That Grows.

In the West Indies dresses are often worn made from the natural lacelike cloth which grows upon trees. The tree from which the lace is gathered has a curiously light hollow trunk something like bamboo. A long smooth section is cut and soaked in water until the bark is softened. The lacelike cloth is closely packed together, forming the shell of the tree. When carefully pulled apart a lacelike fiber is found which is surprisingly tough and durable. By placing several thicknesses together a comparatively thick cloth is formed. These pieces are sewn together like any ordinary cloth and made into dresses. The lace is light yellow in color naturally, but is often dyed with the bright colors so popular in the tropics.—Boys' Life.

Crying for Luck.

If the first person you meet as you are going to work is a woman, you will have no luck that day! Such was once the strong belief of Cornish miners. This curious example of local superstition is mentioned by Mr. Charles T. Gorham, who recalled others in his recent lecture on the subject. It was considered unlucky, for instance, for a woman to "let the New Year in." A woman who read the marriage service through in its entirety before her marriage was said to be fated to spinsterhood. It was also unlucky for a bride not to shed tears on her wedding day, whilst it also brought ill-luck to marry in May. A double share of ill-luck was promised for those who wed during Lent.

Gunpowder Discovered by Koreans.

Koreans discovered gunpowder in 200 B. C., just 14 centuries before the German monk who is ordinarily credited with the discovery, according to Rev. J. A. Duncan, a missionary who recently returned to the United States from Korea. Mr. Duncan says that the early Korean astronomers at Silla thought out the operations of the planetary system and were able to predict eclipses with certainty centuries before the present day scientists give credit for these discoveries. The Koreans also gave the world the magnetic needle, the mariner's compass, metal type and many other things, and used ironclads against the Japanese as early as 1597.

The First Playing Cards.

Early playing cards were called tarots or tarocchi. They differed a good deal in various localities. Packs closely resembling them are found today in parts of Germany and Switzerland which are not much frequented by travelers. In cards of this kind the emblem of death is numbered 13. The notion of bad luck attached to that number is of oriental origin. A tradition relates that a Venetian perhaps Marco Polo, or his father Niccolo, first brought cards from China to his native city, Venice, Italy, which is the first place in Europe where they were known.

Hare Makes Intelligent Pet.

Mr. Edgar Wright, living at Sutton Bridge, Lincolnshire, England, has a hare which he has tamed and taught to play a tambourine and turn a wheel. He caught it on a farm when only two days old, and fed it with a spoon until it was able to feed itself. Its queer antics about the house led to its being trained, and it will now tap the tambourine with its forepaws as often as it is asked. It stands on its hind legs to turn the wheel. After it has done its "turn" it returns to Mr. Wright, and either nestles down to rest or climbs about him, after the manner of a kitten.

A polishing powder for glass may be made by rubbing down calcined magnesia with pure benzine until a mass is formed sufficiently soft to allow drops to be pressed out of it. The mixture should be kept in closely stoppered glass bottles to retain the very volatile benzine. A little should be placed on a pad of wadding or cotton and the glass rubbed with it.

The Usual Result.

The main reason why we have never accomplished much is because when we try to think deeply we get in over our heads.—Dallas News.

Senate Sessions Once Secret.

The sessions of the United States senate for several years after the establishment of the federal government were all secret.

PROPOSED AMENDMENTS TO THE CONSTITUTION SUBMITTED TO THE CITIZENS OF THE COMMONWEALTH FOR THEIR APPROVAL OR REJECTION, AT THE ELECTION TO BE HELD ON TUESDAY, NOVEMBER 2, 1920, BY THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA, AND PUBLISHED BY ORDER OF THE SECRETARY OF THE COMMONWEALTH, IN PURSUANCE OF ARTICLE XVIII OF THE CONSTITUTION.

Number One.

A JOINT RESOLUTION

Proposing an amendment to section eleven of article sixteen of the Constitution of Pennsylvania.

Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of the Commonwealth of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

Amend section eleven, article sixteen of the Constitution of the Commonwealth of Pennsylvania, which reads as follows:

"No corporate body to possess banking and discounting privileges shall be created or organized in pursuance of any law without three months' previous public notice, at the place of the intended location, of the intention to apply for such privileges, in such manner as shall be prescribed by law, nor shall a charter for such privilege be granted for a longer period than twenty years," so that it shall read as follows:

The General Assembly shall have the power by general law to provide for the incorporation of banks and trust companies and to prescribe the powers thereof.

A true copy of Joint Resolution No. 1.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Number Two.

A JOINT RESOLUTION

Proposing an amendment to Article nine, section eight of the Constitution of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That article nine, section eight, be amended to read as follows:

Section 8. The debt of any county, city, borough, township, school district, or other municipality or incorporated district, except as provided herein, and in section fifteen of this article, shall never exceed seven (7) per centum upon the assessed value of the taxable property therein, but the debt of the city of Philadelphia may be increased in such amount that the total city debt of said city shall not exceed ten per centum (10) upon the assessed value of the taxable property therein, nor shall any such municipality or district incur any new debt, or increase its indebtedness to an amount exceeding two (2) per centum upon such assessed valuation of property, without the consent of the electors thereof at a public election in such manner as shall be provided by law. In ascertaining the borrowing capacity of the city of Philadelphia, at any time, there shall be deducted from such debt so much of the debt of said city as shall have been incurred, or is about to be incurred, and the proceeds thereof expended, or about to be expended, upon any public improvement, or in the construction, purchase, or condemnation of any public utility, or part thereof, or facility therefor, if such public improvement or public utility, or part thereof, whether separately or in connection with any other public improvement or public utility, or part thereof, may reasonably be expected to yield revenue in excess of operating expenses sufficient to pay the interest and sinking-fund charges thereon. The method of determining such amount, so to be deducted, may be prescribed by the General Assembly.

In incurring indebtedness for any purpose the city of Philadelphia may issue its obligations maturing not later than fifty (50) years from the date thereof, with provision for a sinking-fund sufficient to retire said obligations at maturity, the payment to such sinking-fund to be in equal graded annual or other periodical instalments. Where any indebtedness shall be or shall have been incurred by said city of Philadelphia for the purpose of the construction or improvements of public works or utilities of any character, from which income or revenue is to be derived by said city, or for the reclamation of land to be used in the construction of wharves or docks owned or to be owned by said city, such obligations may be in an amount sufficient to provide for, and may include the amount of, the interest and sinking-fund charges accruing and which may accrue thereon throughout the period of construction, and until the expiration of one year after the completion of the work for which said indebtedness shall have been incurred; and said city shall not be required to levy a tax to pay said interest and sinking-fund charges as required by section ten, article nine of the Constitution of Pennsylvania, until the expiration of said period of one year after the completion of said work.

Strange Moslem Belief.

It is believed by the Moslems that at the judgment day painters will be required to furnish with souls all representations of human beings which they have made. Failing in this ordeal, they will lose their own souls as a forfeit for their presumptuous imitation of the work of the Creator.

Cause and Effect.

The old miser, who buried his money in the fence corner near the big tree last week has missed part of it. The guilty person has not been apprehended. Andy Dillard went to Plunkville yesterday and purchased himself a fine suit of clothes.—Arkansas Thomas Cat.

Historian Married Seven Times.

One of the best-known examples of a much-married man is afforded by Sir Gervaise Clifton, the historian of Jamaica, who married seven times, five of the brides being domestic servants from his own household. His matrimonial ventures all turned out happily.

PROPOSED AMENDMENTS TO THE CONSTITUTION SUBMITTED TO THE CITIZENS OF THE COMMONWEALTH, FOR THEIR APPROVAL OR REJECTION, BY THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA, AND PUBLISHED BY ORDER OF THE SECRETARY, OF THE COMMONWEALTH, IN PURSUANCE OF ARTICLE XVIII OF THE CONSTITUTION.

Number One-A.

A JOINT RESOLUTION

Proposing an amendment to article three (III) of the Constitution of the Commonwealth of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That article three be amended by adding thereto the following:

Section 34. The Legislature shall have power to classify counties, cities, boroughs, school districts, and townships according to population, and all laws passed relating to each class, and all laws passed relating to, and regulating procedure and proceedings in court with reference to, any class, shall be deemed General legislation within the meaning of this Constitution, but counties, cities and school districts shall not be divided into more than seven classes, and boroughs into not more than five classes.

A true copy of Joint Resolution No. 1-A.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Number Two-A.

A JOINT RESOLUTION

Proposing an amendment to article three, section six of the Constitution of the Commonwealth of Pennsylvania, so that the subject of an amendment or supplement to a law and the subject to which such law is extended or on which it is conferred shall be clearly expressed in its title.

Be it resolved by the Senate and the House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That section six of article three be amended so as to read as follows:

Section 6. No law shall be revived, amended, or the provisions thereof extended or conferred, by reference to its title only. So much thereof as is revived, amended, extended, or conferred shall be reenacted and published at length, and the subject of the amendment or supplement and the subject to which such law is extended or on which it is conferred shall be clearly expressed in its title.

A true copy of Joint Resolution No. 2-A.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Number Three-A.

A JOINT RESOLUTION

Proposing an amendment to section one, article eight of the Constitution of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That section one of article eight, which reads as follows:

"Section 1. Every male citizen twenty-one years of age, possessing the following qualifications, shall be entitled to vote at all elections, subject, however, to such laws requiring and regulating the registration of electors as the General Assembly may enact:

"First. He shall have been a citizen of the United States at least one month.

"Second. He shall have resided in the state one year (or, having previously been a qualified elector or native-born citizen of the State, he shall have removed therefrom and returned, then six months), immediately preceding the election.

"Third. He shall have resided in the election district where he shall offer to vote at least two months immediately preceding the election.

"Fourth. If twenty-two years of age and upwards, he shall have paid, within two years, a State or county tax, which shall have been assessed at least two months, and paid at least one month before the election," be amended so that the same shall read as follows:

Section 1. Every citizen male or female of twenty-one years of age, possessing the following qualifications, shall be entitled to vote at all elections, subject, however, to such laws requiring and regulating the registration of electors as the General Assembly may enact:

First. He or she shall have been a citizen of the United States at least one month.

Second. He or she shall have resided in the State one year (or, having previously been a qualified elector or native-born citizen of the State, he or she shall have removed therefrom and returned, then six months), immediately preceding the election.

Third. He or she shall have resided in the election district where he or she shall offer to vote at least two months immediately preceding the election.

Fourth. If twenty-two years of age and upwards, he or she shall have paid, within two years, a State or county tax, which shall have been assessed at least two months and paid at least one month before the election.

Fifth. Whenever the words "he," "his," "him," and "himself" occur in any section of article eight of this Constitution, the same shall be construed as if written, respectively, "he or she," "his or her," "him or her," and "himself or herself."

A true copy of Joint Resolution No. 3-A.

Curing Insomnia.

On the theory that insomnia can be cured by lessening the moisture in the lungs, an Englishman has invented apparatus supplying warm, dry and sterilized air to be breathed.

Putting the Clock Ahead.

How times have changed. The old fashioned girl who used never to sit up later than nine o'clock has a daughter now who just starts out at nine o'clock for the evening.

Talented Young Graduate.

"Yes," said Farmer Wiggins, "my darter's goin' to graduate and get a deplunket. Then when she has it we're a-goin', to send her to a musical mesogitory to be finished!"

Number Four-A.

A JOINT RESOLUTION

Proposing an amendment to section one (1) of article fifteen (XV) of the Constitution of the Commonwealth of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That section one of article fifteen, which reads as follows:

"Section 1. Cities may be chartered whenever a majority of the electors of any town or borough having a population of at least ten thousand shall vote at any general election in favor of the same," be, and the same is hereby, amended to read as follows:

Section 1. Cities may be chartered whenever a majority of the electors of any town or borough having a population of at least ten thousand shall vote at any general or municipal election in favor of the same. Cities, or cities of any particular class, may be given the right and power to frame and adopt their own charters and to exercise the powers and authority of local self-government, subject, however, to such restrictions, limitations, and regulations as may be imposed by the Legislature. Laws also may be enacted affecting the organization and government of cities and boroughs which shall become effective when submitted to the electors thereof, and approved by a majority of those voting thereon.

A true copy of Joint Resolution No. 4-A.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Number Five-A.

A JOINT RESOLUTION

Proposing an amendment to article nine, section seven of the Constitution of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That article nine, section seven be amended to read as follows:

Section 7. The General Assembly shall not authorize any county, city, borough, township, or incorporated district to become a stockholder in any company, association, or corporation, or to obtain or appropriate money for, or to loan its credit to, any corporation, association, institution or individual.

This section shall not apply to any contract entered into by the city of Philadelphia under legislative authority with respect to the use or operation of transit facilities, whether furnished by the city or by a private corporation or partly or jointly by either or both. Nor shall this section be construed to prohibit the city of Philadelphia from acquiring by contract or condemnation the franchises and property of any company owning or operating transit facilities, or any part thereof, within its corporate limits, or the shares of stock of the corporation owning or operating the same, or any part thereof.

A true copy of Joint Resolution No. 5-A.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Number Six-A.

A JOINT RESOLUTION

Proposing an amendment to the Constitution of the Commonwealth of Pennsylvania so as to consolidate the courts of common pleas of Philadelphia County.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof:—

That section six of article five be amended so as to read as follows:

Section 6. In the county of Philadelphia all the jurisdiction and powers now vested in the several numbered courts of common pleas of that county shall be vested in one court of common pleas composed of all the judges in commission in said courts. Such jurisdiction and powers shall extend to all proceedings at law and in equity which shall have been instituted in the several numbered courts, and shall be subject to such change as may be made by law, and subject to change of venue as provided by law. The president judge of the said court shall be selected as provided by law. The number of judges in said court may be by law increased from time to time. This amendment shall take effect on the first day of January succeeding its adoption.

In the county of Allegheny all the jurisdiction and powers now vested in the several numbered courts of common pleas shall be vested in one court of common pleas composed of all the judges in commission in said courts. Such jurisdiction and powers shall extend to all proceedings at law and in equity which shall have been instituted in the several numbered courts, and shall be subject to such change as may be made by law, and subject to change of venue as provided by law. The president judge of the said court shall be selected as provided by law. The number of judges in said court may be by law increased from time to time. This amendment shall take effect on the first day of January succeeding its adoption.

A true copy of Joint Resolution No. 6-A.

CYRUS E. WOODS,
Secretary of the Commonwealth.

Mount McKinley Sinking.

Mount McKinley, the Oregon mountain, is sinking with the weight of ages. Within the last several years, when the peak shrugged its rocky shoulders in earthquakes, the loftiest mountain in North America has subsided at least 700 feet from its original altitude of 20,400 feet. Such was the assertion of Herschel C. Parker, geologist and mining engineer, who first scaled Mount McKinley in 1912.

Philosophy of a Cipher.

Consider the cipher. It amounts to nothing in itself, but when put at work with others behind a good strong figure it adds wonderfully to the value of the group. But if a cipher puts on airs and gets out in front of the procession, it becomes valueless again. Men might take a lesson and learn that their value lasts only as long as they stay on the job.

TARDY CONSERVATION

The Audobon Association is working actively for the repeal of the bounty law in Alaska which provides for a payment of 50 cents for every American eagle killed within that territory. Since the passage of the law nearly 9,000 eagles have been killed and the slaughter is still going on at the rate of 200 birds a month.

At the last session of the legislature an attempt was made to repeal the law. It failed, but perhaps the next time it will succeed.

The Secretary of the Alaska Fish and Game Club, in a letter written in April, tells of the terrible thoroughness of the slaughtering of these birds.

"A vast difference is noted in the number of this bird showing in southeastern and western Alaska,and it is a safe prediction that if the slaughter continues for a few years longer the species will become practically extinct in this country."

It would indeed be a crime if the American eagle driven from all his native haunts and left to us only in a few stuffed specimens in natural history museums. Americans are too heedless about such things. Our wild flowers, our finest forests and the bird and animal life of woods and fields are all considered of no importance until suddenly someone discovers that some particular species is rapidly being wiped out. Then a frantic effort is made to save the remnants, but no lessen is learned as to the need of exercising watchful care that other forms of life, and beauty may receive genuine protection before it is too late.

MYSTERIES OF THE SEA

Can a lifebelt be borne bp currents across the Atlantic from the Irish to the American coast, then be swept far up a river by tides, and remain intact throughout such a journey requiring five years? That is the question involved in the discovery in the Delaware River at Philadelphia of a battered lifebelt bearing the inscription, "Lusitania"— the historic name of the great passenger ship which a German torpedo sent to the bottim with frightful loss of life on May 7, 1915. This question is said to be answered in the affirmative by experts who say that the possibility of so strange an event is confirmed by the scientific observation and record many precedents.

If, then, a Lusitania lifebelt set afloat near Queenstown can appear at the inland port of Philadelphia across the Atlantic more than five years later. the incident is more than a reminder of a besitial atrocity which will hound the German people for generations to come. It is also a promise that long missing ships may still be heard from. It may still be possible. for example. to clear up the mystery of the United States collier Cyclops which sailed March 4, 1918, from Barbados expecting to reach an American port nine days later. Since that no news of her or of any of the 300 persons on board has been received, careful search having failed to reveal a single bit of identificable wreckage. Yet the remarkable incident reported above shows there may be still afloat some article, or some indirect message, which will furnish a clue to the Cyclops' mysterious fate.

THE FRUIT CROP.

Apples and peaches are to be plentiful the State Department of Agriculture asserts, and sugar is coming down slightly in price and is to be had in generous quantities. The outlook for the canning season is brighter than it was a month ago. Always we are on the point of being starved to death but we never quite get there. We suspect that apples and peaches will both be lower in price this year than last. and that when the grain crop is harvested and the corn is all in the crib, we shall be able to sit in front of the fireplace and have pleasant thought of Thanksgiving and the winter season to follow.

It is mighty gratifying to note the rapid growth of Pennsylvania as an apple producing state. The crop estimate this year is 11,488,000 bushels as compared with 7,814,000 bushels for 1919. and while there is a prospect of this shrinking somewhat by reason of a heavy drop of apples during July, the yield will be of record breaking proportions and big enough to put Pensylvania well up among the apple states of the country. Apples are as saleable as wheat and the price is always good. Pennsylvania orchards are designed to be one of the great profit-making agencies of the state.

Remember your dead. W. S. Cook and Co. Monuments with Lawrence Free Funeral Director. 208tf

HARDING AND LIBERTY BONDS.

The eminently respectable New York Times, speaking for its financial friends, rebukes Senator Harding for saying: "This government should make its Liberty and Victory Bonds worth all its patriotic citizens paid in purchasing them."

The Times, organ of large financial interests, and supporting the peace league that the interests need "in their business" asks this question:

"Why should the Republican candidate for the presidency ladle out financial ideas which are both crude and perilous?"

Is it really "crude and perilous" to suggest that a government bond should be kept at its face value? That "crude and perilous" talk was not the sort that The Times ladled out to patriotic citizens when big business wanted these citizens to buy government bonds and enable the government to pay profits to the profiteers.

The Times is mistaken if it thinks to injure Mr. Harding by publishing the fact that he would like to see the men who lent Uncle Sam a hundred dollars in the war get back that hundred dollars and not eighty-four dollars, when he needs the money.—Arthur Brisbane.

Senator Robinson, of Arkansas, chairman of the Democratic notification committee, in his address to the nominee, Governor Cox, at Dayton, Ohio, last Saturday, said that if Senator Harding "was elected it would mean war." It seems we have heard of a similar statement, about four years ago when the slogans ran "A vote for Hughes is a vote for war." Likewise, "Vote for Wilson, he kept us out of war." Well, we all know what happened.

"Picture Brides?"

The manner of "picture bride" marriages in California is this: A Japanese sends his picture to his relatives in Japan who select a suitable maiden and in turn forward her photograph to the waiting suitor in America. If satisfactory, the relatives on both sides meet, hold a banquet and the marriage is considered a fact. The wife then joins her husband in this country.

When Man Weighs Nothing.

Prof. Edward V. Huntington of Harvard university showed by an elaborate mass of figures printed in Science that a man on a train moving along the equator westward at 18,700 miles an hour, or eastward at 16,700 miles an hour would weigh nothing, as measured by an observer on the train.

Dreaming of Old Age.

To dream of old age is a sign of coming good news. To see an old man is a sign of love for the young dreamer, a sign of success for the mature person. To see an old woman in one's dream foretells an immediate pleasant surprise.—Chicago Herald and Examiner.

Alfalfa.

Alfalfa receives its name from an old Arab word which means in English "the best kind of fodder." The plant looks something like clover and grows very rapidly. In fact it grows so quickly that three or four crops can be harvested during the summer.

Incas' Marvelous Dye.

Garments of the Incas, dyed with indigo before Columbus discovered America, have been found in ancient tombs in Peru, according to Doctors M. A. Velasquez and A. Maldonado of Lima. The blue dye has not even begun to fade.

Don't collide with anything. The man at the helm must know how to steer away from obstructions and avoid shoals if he would successfully make the ports and havens adown the streamway of life.—Humphrey J. Desmond.

Actions That Count.

Let us, if we must have great actions, make our own so. All action is of infinite elasticity, and the least admits of being inflated with celestial air until it eclipses the sun and the moon.—Emerson.

Taking Chinese Census.

The inhabitants of China are counted every year in a curious manner. The eldest master of every ten houses has to count the families and make a list, which is sent to the Imperial taxhouse.

A CENTURY OF ANTHRACITE

First Ton of Hard Coal Reached the City of Philadelphia Just One Hundred Years Ago.

An even hundred years have elapsed since one William Wurts, a Philadelphia merchant, drove his team of mules with the first ton of anthracite through the spring freshets and bog land to the banks of the Delaware river and floated the new fuel down the river to Philadelphia on a pine log raft.

But he experienced no little difficulty in that first anthracite year of 1820 in overcoming the popular objection that the coal was "extremely slow of lighting." Pine log rafts floated only 205 tons of anthracite that year. But it fetched a price of $12 a ton and could be delivered freight-on-raft Philadelphia at $3—a fact that was freely advertised to attract additional capital, for, of course, there was no profiteering in those days.

Spring freshets and bog land and slow inflammability no longer worry operators. Silk shirts for miners are a bigger nuisance. But production in a hundred years has jumped to 86,-000,000 tons, and could this year surpass the 100 million-a mark, which was almost reached in 1917.

Reading, Wilkesbarre, Lehigh, Mauch Chunk—these names are spoken one thousand times hourly in the industrial world today, simply because there lay up in the hills of Pennsylvania a hard, black substance, one ton of which sly old William Wurts steered on a raft down the Delaware to Philadelphia, just one hundred years ago.—Wall Street Journal.

ASTRONOMY STILL AT FAULT

Men of Science Forced to Admit Exact Results From Their Calculations Are Not Possible.

The celebrated observatory at Greenwich, the place from which we reckon longitude, was founded by Charles II in 1675, mainly for the purpose of investigating the movements of the moon in the interests of navigation. Although in the intervening two and a half centuries astronomers have worked at the problem, the moon has not yet become entirely amenable to their mathematics. In a recent report of the observatory at Greenwich attention is invited to the increasing deviation between the calculated position of the moon in the sky and its real position shown by the Greenwich observations. The deviation has lately been growing in a serious manner. The error last year was more than twelve times as large as the error twenty years ago, and the average annual increase during the two decades has amounted to half a second of arc in longitude. The reason that astronomers have failed in getting exact results from calculations based on the dynamical laws of gravitation is possibly the existence of some attractive force that they have not yet discovered, although the result may also be affected by the true shape of the earth, which still awaits accurate determination.

Deadly Weapon of Warfare.

An invention by a French wireless engineer, M. Dunoyer, will completely change the character of naval warfare, if its claims are fulfilled, says the London Mail. It consists of what he calls an "electric safety lock." The mechanism to direct the course of a torpedo and secure its explosion against an enemy warship can be worked not only by wireless waves of the right length, but also by a proper sequence of Morse signals. Any error in the right sequence of dots and dashes would run the mechanism down to zero again and render the torpedo harmless. Each torpedo launched would have its own key sequence of dots and dashes, and so the enemy would be unable to tamper with it.

Books From Washington's Library.

The sale of the library of the late Samuel Riker of this city was concluded at the Anderson Galleries recently. Dr. A. S. Rosenbach paid $4,000 for George Washington's copy of "A Collection of All the Treaties of Peace, Alliance, and Commerce Between Great Britain and Other Powers From the Treaty Signed at Munster, in 1684, to Treaties Signed at Paris, in 1783," three volumes, London, 1785. The work contains Washington's autograph on each title page and his book plate on the inside of each front cover. The work was auctioned off at the sale of the library of Lawrence Washington, the great grandson of George Washington, in Philadelphia, in 1876.—New York Times.

Air Commodore Edward Maitland of R-34 fame, speaking at the Royal Society of Arts, said that while flying the Atlantic he retired about 9 a. m. and he was ashamed to say he slept until nine the next day. He found that the air not only induced sleep, but sharpened the appetite. Ladies had often asked him, the commodore said, "In what should we dress when about to take an aerial flight?" He felt tempted to suggest crinolines, which would become very useful as parachutes should the necessity arise. —London Chronicle

A Big Contract.

"I see where the people at Atlantic City are asking the authorities to make the high winds stop blowing the sand about at Chelsea."

"Next thing the public will be demanding that somebody stop the hot air blowing in congress."

AUGUST
BLANKET SALE

Now is the time to prepare for the cool months that are to come Coal shortage and transportation difficulties make it advisable to prepare. Our high grade line of Cotton and Wool Blankets is complete and prices are lower now than they will be later. Every indication points to higher prices later so we urge you to buy now at the following prices:

COTTON

64 x 76 Grey . . .	$3.00
66 x 80 Tan . . .	$3.39
72 x 84 Grey . . .	$3.59

WOOL

70 x 82	$14.50
74 x 84	$18.00

NOTE: All Wool Blankets are strictly guaranteed all wool, both warp and filling.

Fau Dry Goods Co.

Tactful Youngster.

Mother bought a box of candy, but it was nearly dinner time so would not give any to Sonny. While waiting for the dinner bell to ring Sonny said: "Mamma, let's play store." Mother was willing, so the child went on with his game of make-believe. Said he: "This room will be the candy store. You be the clerk and I'll be buying, but, oh, mamma, let's have real candy!"

Why High Noon Weddings.

All of us frequently use expressions of which we do not really know the meaning. Did you, for example, know that noon is the traditional hour for a wedding ceremony because in the olden days in England the bridegroom could not be relied upon to be sober any later in the day than this hour?

Be Truthful Always.

He that is habituated to deceptions and artificialities in trifles, will try in vain to be true in matters of importance: for truth is a thing of habit rather than of will. You cannot in any sudden and single effort will to be true if the habit of your life has been insincere.—F. W. Robertson.

Bad Temper.

It is an almost invariable rule that complaints are mutual. There are two sides to every bad temper. The truth is, bad temper is due less to the occurrence of irritating things than to the occurrence of things to irritable people.

Magpie Sacred in Norway.

The magpie is, or was, held to be sacred in Norway, and whoever lifted a hand against it promptly brought down a curse not only upon himself, but on his family, relations, intimate friends, live stock and household goods.

Napoleon's Height.

Historians say that at the time of his coronation Napoleon Bonaparte was a little under five feet, three inches, but he became stooped later in life and at his death measured scarcely more than five feet.

Awful Possibility.

Edward was talking cannibals to his sister. Rather frightened, the little sister said: "Oh, I hope they don't come here. If they do, the'd eaten us up and then we won't have ourselves."

Tempered With Mercy.

Even the girl who gets mad when she is kissed by a man is always merciful enough to remember that "perhaps the poor fellow couldn't resist such a temptation."—Houston Post.

SCIENTISTS MAKE NEW CASTOR OIL REALLY TASTELESS

Remarkable Process Improves Famous Old Family Remedy

Nobody ever dreamed that castor oil could be made tasteless. But the chemists of Spencer Kellogg & Sons Inc. one of the largest manufacturers of castor oil, tackled the problem and succeeded in perfecting a process by which the taste is absolutely removed. Today everybody can take castor oil easily, for Kellogg's Tasteless Castor Oil is really tasteless. Nothing is put in to disguise the taste. Strength and purity are unchanged. Curative healing, and soothing qualities remain the same. It's the same good, old-fashioned castor oil that your doctor always prescribes, with the taste removed. Children take Kellogg's tasteless Castor Oil easily. No bribing or coaxing. You can now get Kellogg's Tasteless Castor Oil at all good druggists. Do not accept substitutes, if you want a really tasteless castor oil. Insist on Kellogg's Tasteless Castor Oil. Two sizes 35c and 65c. (Advt.)

Notice To Coal Dealers

Sealed proposals for furnishing 18,000 bushels, more or less, of first class, run of mine, Pittsburg seam of coal to the several School Buildings of the Charleroi School District will be received by the Secretary of the Board of Directors until 8 o'clock Tuesday evening, August 17. Board reserves the right to reject any or all bids.

Dr. T. M. Faddis, Secretary,
521 Washington Avenue.
Aug 10-11-12-13-14-16

A fisherman says the potency of his bait is due to feeding the worms on sugar. This is a lot of trouble compared with the old days, when the only bother with the bait was keeping the cork in it.

I have several buyers for lots in Charleroi and Lock 4, if you wish to dispose of that lot quick, list with me. Clyde B. Cope, 315 McKean avenue. 56-tf

Charleroi People

Are Taking Kindly to Simco Salve. and F. J. John is reporting pleased customers.

SIM-CO SALVE is immediately active in reducing the soreness of the tender, sensitive lungs of infants or the lungs of the sturdy parent alike, thereby reducing the fever.

The magic wonder is that relief comes so quickly. It frees clogged nostrils and inflamed air passage in the head, which inflammation sometimes leads to catarrah and impaired hearing.

SIM-CO SALVE is a modern, efficient ointment, active in killing germs, and therefore gets prompt results when used for eczema and other skin troubles; distressing, tortured skin that burns like fire is soothed immediately. Those common, continued ear bealings and nose sores are checked by inserting small quantities of SIM-CO CALVE

It is perfectly pliable and is a mighty good modern liniment for all liniment needs.

When you buy SIM-CO SALVE what you pay for is satisfaction and that is what we guarantee to you.

Better be prepared at once; go to F. J. Johns drug store today and get a jar. Price 30c. 60c and $1.00 per jar. If your druggist does not keep it, send us 35c and the parcel post will bring it to your door by return mail Wm. M. Simpson Drug Co., Wholesale Druggists, Wilkinsburg Station, Pittsburg, Pa.

All know the Ten Commandments.
Most know the Eleventh.
A few know the Twelfth.
Do YOU know the Thirteenth?
Come and see it flaming on the smreen in this vivid, vital tale of love and married life.
Ethel Clayton in a role that searches the heart of every woman—deeply interests every man.
Coyle Theatre tomorrow. One day only.

No wonder food is scarce. They are making moonshine booze out of macaroni, spaghetti, vermicelli, potatoes, rice, raisins, rye, and corn, and a few other foods.

Mrs. Joseph Allsopp and daughter Gladys left last evening for Cambridge Springs and Lake Erie for their mid-summer vacation.

Use the Classified Column.

BERRYMAN'S

Semi-Annual Remnant Sale

Thursday and Friday, Aug. 12, 13

The Greatest of All Selling Events in Charleroi

Nothing more need be said—any and everybody who has ever attended one of Berryman's Semi-Annual Remnant Days knows what they mean—dollars enough saved to make pile for coming miles. Hundreds of people come from far and near—they get such fine things—and they save a good substantial sum of money.

HUNDREDS OF

REMNANTS

ODD LOTS AND SHORT ENDS RADICALLY REDUCED FOR QUICK HURRIED SELLING

of Dress Goods
of Silks
of Percales
of Calicoes
of Toweling
of Ribbons
of Laces
of Muslins
of Ginghams
of Voiles
of Table Linens

Everything we have just a few of will have a remnant price marked on that will sell out quickly.

Tremendous reductions will be made on Suits, Coats, Skirts, Dresses, Hats, shapes and trimmings, everything at 8:30 o'clock—no sooner. Don't forget the date, Thursday and Friday, Aug. 12 and 13

J. W. Berryman & Son

Charleroi's Busy Store

Nature's Adaptation.

British mine-rescue investigators have made the curious discovery that while the average man is stimulated by the oxygen of their apparatus, no effect on miners is apparent. It is suggested that long work in a close atmosphere has given the lungs such full use of the available oxygen that an excess has no influence.

Rival Odors.

If you feel that you are experiencing hard luck, think of the Oregon man who recently completed a comfortable rose cottage on the seashore, when the sad sea waves washed up a dead whale in front of his home, and now he's decided that it will be cheaper to move the cottage than the whale.—Boston Transcript.

First Use of Water Colors.

Water colors were practically unknown in Europe until the eighteenth century, and they were used only as a vehicle in art. Fresco paintings were a natural outgrowth of their use. Water colors were employed by the artist in decorating many famous buildings. They took the place of oil colors.

Paradox.

Matherson surprised his friends at the club one evening by rising to leave much earlier than usual. "Why this haste?" said one of his friends. "The night is still young." "I know," replied Matherson; "but I promised my wife to be home by ten-thirty tonight and if I miss the last train I shall catch it!"

Saw Son Made President.

Mrs. Eliza Garfield was the first woman who ever saw her son inaugurated president of the United States. Washington's mother was living in Fredericksburg, Va., when the father of his country was inaugurated, but she did not witness the ceremony, which took place in New York.

Riches of the Incas.

The image of the sun, which the Incas worshiped, was engraved on a massive plate of gold of enormous dimensions, richly powdered with emeralds and precious stones. An effigy of the moon, the sun's supposed wife, was a vast plate of silver.

Cosmic Dust at Bottom of Sea.

It has been only lately discovered that cosmic dust forms layers at the bottom of the deepest seas. Between Honolulu and Tahiti, at a depth of 2,250 fathoms—over two miles and a half—a vast layer of this material exists.

WANT ADS

FOR SALE—Six rooms of furniture. Almost new. Apply 533 Washington Avenue. 45-tf

FOR SALE—Five rooms. McKean avenue. A good buy. See A. L. Dubinsky, 407 Fallowfield avenue. 49-tf

CLERKS—(Men, women) over 17, for Postal Mail Service. $135 month. Examinations August. Experience unnecessary. For free particulars write R. Terry, (former Civil Service Examiner) 931 Continental Bldg., Washington, D. C. 50-t7p

FRESHMAN CLASS AT STATE FILLED

The freshman class at the Pennsylvania State College, Centre county, is now filled. Seven hundred and fifty applicants have been admitted and it is not yet known how many will have to be turned away by lack of necessary teaching and class room facilities. The task of admitting this number was of such proportions as to overshadow the records of all previous years. It is estimated that applications were received from nearly 2,000 high and preparatory school graduates, resulting in the burning of much midnight oil on the part of college officials to properly and in all fairness make up the personnel of the incoming class.

In placing the limit on new students for the coming year at 750 the trustees had only one course to follow—relief for already overcrowded class rooms and laboratories. With even this number enrolled at Penn State next fall the remaining classes will bring the total student attendance to over 3,300, greater than last year, when 3,165 made the record enrollment.

SAYS TRACK WILL BE MUCH FASTER

Tommy Milton, the auto speed king, was in Uniontown on Friday last and visited the big speedway in the shadow of the Laurel Hill range of mountains, and expressed himself as being highly pleased with the manner in which it is being done. Work on repairing the track on the east curve at the speedway is practically completed and the new surfacing is being rushed forward. Lumber shipments are arriving at the rate of a car a day.

Milton said that patrons of the Speedway will see the fastest and most spectacular race on Labor Day that has ever been staged on any speedway and the increased speed will make a car hard to control in event of a blowout. Milton gave his opinion that the Labor Day classis would be run at the rate of 100 miles per hour, something that has never before been accomplished on a track the size of the one at Uniontown.

MINERS ORGANIZE SOCCER FOOT BALL

District No. 5 Mine Workers' Soccer Association was organized at a meeting held Saturday afternoon [illegible] the headquarters of the United Mine Workers of this district in Pittsburg. Indications point to a 24-club association, divided into three sections of eight clubs each. The season will get under way the first Saturday in September and continue until the snow flies. It is expected that Roscoe, Dunlevy, Victory Hill and Gallatin will be represented by terms in the new association.

WAGON MINE HEARING AT HARRISBURG TODAY

Western Pennsylvania coal operators who have been objecting to the distribution of cars and shortage alleged due supply of cars to wagon mines, will submit the situation to the Public Service Commission at Harrisburg today. Representatives of the operators have been in communication with the Commission for some time on the question. The Commission forbade sending cars to wagon loading sidings several months ago, but the practice has been resumed.

DRILLING HALTED BY ORDER OF COURT

A preliminary injunction restraining the McKeesport-Monessen Oil and Gas company from further drilling on its McKeesport lease was granted in the Allegheny County courts on Monday, as the result of a bill in equity filed by F. O. Van Kirk and Barbara VanKirk, stockholders. The plaintiffs claimed further drilling would be a waste of company funds. A hearing will be held on Wedesday.

OUR JOB DEPARTMENT IS ALWAYS BUSY—THERE'S A REASON

GET RESULTS FROM HOLIDAY

Vacation Days Should Be as Carefully Planned as Is the Work of the Year.

To the question, "What will you do on your holiday?" some might reply, discerning a possible tilt against the strenuous holiday, "Nothing!" That would be as wrong as doing too much. The perfect holiday, for the average worker, should be on crescendo and diminuendo lines, observes a writer in London Answers.

You pass into your fortnight or three weeks quietly. Your body is, literally, a machine. It has been doing work—hard, monotonous work—for a year. To switch it on suddenly to something quite different is to ask for trouble.

The walkers to Bridgton don't plunge at the walk. They begin with short walks, to get themselves in trim.

So whatever you are going to "do" on your holiday do it slowly and quietly at first, so that the machine of your body may "change gears" without jar, break or mishap. Then by the middle of your holiday you will be in good trim and the best of health.

And it is necessary, if your holiday is to do you real good, and build you up for another year's work, that you should gradually slow down with your holiday activities, resume your work without, as it were, having to make yourself do it.

Who has not known that post-holiday feeling of not being able to settle down? It is the result of living a holiday at high pressure and ending at high pressure. Let the steam off gradually, so that you may pass from your holiday back to your work without effort.

REFUSED TO ABANDON GAME

Plucky Terrier Died With Fox It Had Run to Earth and Killed in Combat.

What is believed to be an unprecedented end to a combat between a fox and a terrier is reported from the Lake country.

A stout hill fox hunted by the Blencathra hounds for three and a half hours on the mountain heights above St. John's-in-the-Vale sought sanctuary in a fissure of rock in a crack near the skyline of Wanthwaite. Here he faced one of the gamest terriers belonging to the pack and, scrambling to a shelf in the rocks, was able for some time to give as fierce punishment as he got.

The terrier killed the fox, but refused to leave it and followers and hounds had at last to quit the crags so that they might make the descent of one of the most dangerous ravines of the mountain range before darkness. When huntsman and whip returned next morning to the crag they found terrier as well as fox lying dead outside the borran.

An examination of the terrier showed that the fox had inflicted no mortal wound upon him. The terrier had dragged the fox out and then, loth to leave it, had laid down beside it. It was clear that he had died from exposure during a bitterly cold night. No similar case has, so far as is known, occurred before.—London Times.

When in Doubt, Add 10 Per Cent.

A Wall street man was negotiating with a country tinsmith for the renewal of the rain gutters on his house. Inquiring cautiously about the cost of copper gutters, he was surprised to find that they would cost him at the rate of more than 50 cents a pound, though the metal sells in ingots around 19 cents.

"Well," said the smith, "you see the men that work the metal up in the shop get $5 a day. The shop adds 10 per cent for the workmen's insurance and aims to make at least $1 a day on every man. When it comes to me, I figure the cost of the materials and labor, and I have to add 10 per cent to the wages to cover insurance cost, too. Then I have to add 10 per cent to the whole thing for overhead, 5 per cent for the use of the car and 13 per cent for being a boss. So I really don't get any profit on the job at all. All I get out of it is my living, you might say."—Wall Street Journal.

Mr. Bostock has told how he succeeded in making a lion and lamb firm friends.

"I placed in the lion's cage all sorts of toys of the animal—variety—cotton sheep, horses, rabbits—in fact, a regular Noah's ark," said Mr. Bostock. "Then I specialized on manufactured sheep, but it took a long time for the lion to find out that they were not good to eat. Finally a live lamb was introduced. At first the lion looked surprised, and then lay down and gently pawed the stranger. The lamb did not like this, and drawing back a pace or two lasted the lion in the mane. This appeared to amuse the lion greatly: he playfully rolled over on his back, while the lamb butted again. Now they are fast friends, and an insurance company would be justified in taking the lamb as a first-class risk."—F. H. Cheley in "Stories for Talks to Boys."

World's Glass Industry.

Glass factories of Bohemia are filled with orders and working at full capacity, but are likely to suffer in the future because of the competition that arose in this trade during the war. Japan is one of the largest competitors. New glass factories also have been founded in Belgium, the Ukraine, Roumania and Poland.

The Girl's Career.

We talk about the girl who chooses a career. The most wonderful and varied of all careers is that of motherhood and homemaking, says a writer in Thrift. It is intricate, difficult and yet withal a wonderfully beautiful situation. Love must lead the way, otherwise one would be unable to cope with its problems. No profession is so varied. Not a day goes by that the mother and housekeeper does not use by actual practice most of the sciences. She must have tact, patience, a knowledge of human nature, understand sanitary laws and be an example of thrift. Not only qualified to care for the bodies of those committed to her keeping, but be capable of training the mind and developing the souls of her children; and yet how many foolish girls feel it is a life needing no preparation.

Foolish to Postpone Duty.

Postponing is a confession of unpreparedness. The prepared man does not know just what is going to happen half the time. But he does know how to meet problems when they come up. He has wrestled with them in mind before they happen in experience and he knows therefrom how to approach them. Sometimes he is called a crank because he will not become entangled with a host of things not directly associated with his work. But that's only wisdom. He knows the demands that will come and saves his strength to meet them when they do. The other man just hangs ahead and when something turns up that is a little hard he puts it off until tomorrow. That means that if it ever gets done it must be run in with something else.—Grit.

"Holy Men" of India.

In India there are no less than 4,000,000 sadhus or holy men," usually ash besmeared and almost naked. Frequently these have chelas or disciples—boys who accompany them, begging for their master, being trained for this same life. To go about begging one's food from door to door, with saffron-colored robe, a begging bowl, an antelope skin on which to sit, a chain of beads with which to count one's prayers, and a blanket in cold weather—such are the old ideals of India as to the highest life to which a man could attain. Some believe that by unnecessary suffering, such as sitting on beds of spikes or swinging the head downward over a fire, they can attain deliverance.

Out Fell the Fish.

Although I experienced my most embarrassing moment almost a year ago, I have not forgotten it yet. After fishing for almost half a day all I caught was two small fish, which of course I did not wish to display, so I wrapped them in a small piece of paper and put them in my hat. While sitting in the car homeward bound, who should enter but my fiancee. I tipped my hat as she came forward and to my surprise out fell the fish but that was not all when I stooped to pick them up they jumped all over the floor, not being entirely dead. When I finally caught them I can assure you I did not put them back into my hat.—Chicago Tribune.

Possible End of the World.

The earth has rotated at its present rate ever since it first took shape out of a molten mass. The centrifugal force constantly generated by its motion has produced a swelling all around the equator 13 miles thick. If the motion were suddenly stopped this bulge would collapse under its own weight, and as its ramifications pervade the structure of the continents all the land of the earth would be carried down with it. The seas would flow away from the equator and deluge the lands near the poles. Volcanoes would burst out at weak spots, and the whole earth would become a land of fire.

Have Varying Rotations.

Other worlds, that circle around the sun much as we do, have different kinds of rotation from ours. Our satellite world, the moon, for instance, is a body with little rotation. The day is long there, two weeks in duration, and the night is equally long. On the planet Jupiter the whole day is less than ten hours long. If it were dawn there at what would be six in the morning, it would be noon at half past eight, dark at eleven, and light again at four, in what would be to us the afternoon. The sun would apparently race across the sky so fast that one could see it go.

Following is a list of the best known Scottish clans: Buchanan, Cameron, Campbell, Chisholm, Colquhoun, Cumming, Drummond, Farquharson, Ferguson, Forbes, Fraser, Gordon, Graham, Grant, Gun, Lamont, McAlister, McDonald, McDonnell, McDougall, McFarlane, McGregor, McIntosh, McKay, McKenzie, McKinnon, McLachlan, McLean, McLeod, McNab, McNeill, McPherson, McQuarrie, McRae, Menzies, Munroe, Ogilvie, Oliphant, Robertson, Rose, Ross, Sinclair, Stuart, Sutherland.

To Clean Silver Easily.

To clean silver in the easiest possible way, put a piece of aluminum into an enamel bowl (never use an iron one), add two quarts of boiling water and two tablespoonfuls of washing soda. Let silver stay in water five minutes. Rinse in warm water and dry with clean cloth.

Silence Generally Best.

To suffer in silence, to refrain from answering the bitterest of calumnies places us on a vantage point vastly superior to those who would injure us and discounts what they may say. Gossip only becomes serious when we countenance by denial. Silent contempt speaks louder than the most vociferous contradictions. Nothing is harder to bear in silence than vilification, yet that it is the part of wisdom to do so is illustrated daily. There may come a time in our lives when saying nothing will seem to be an acknowledgment of guilt and then will be given an opportunity to reply to calumniators. But the ordinary little backbitings of every day life are best met in steadfast silence. In replying to them we are apt to lose our temper and our dignity, which is both foolish and futile.—Exchange.

Finny Veterans.

What is the average age of fish? There is not a great deal of information on the point, but it would seem that a plaice is a veteran at twenty. One of that age was recently caught in the North sea. It had been previously caught 16 years ago, when it was reckoned to be about four years old. An identification disk was placed on it in accordance with the international scheme of inquiry into the migration, growth and age of fish. Then it was released, but it ultimately ended its romantic career in the toils of a trawl net. The oldest-living fish would seem to be carp, specimens of which have been known to live 200 years; while at Plymouth, in a tank, is a large conger eel whose age is reckoned at forty.

"To Forgive Is to Forget."

In a divorce case heard recently in Glasgow the question arose as to the difference between "condonation" and "forgiveness," the New York Evening Sun states. The judge decided that in a Christian, as well as a lay sense, it was assumed that every man had a slate on which were written the faults of his wife. Then forgiveness would be the complete wiping off the slate of the record. In condonation there was no blotting out. The record remained on the slate and was only covered over with a piece of paper with the remark: "That will obscure the record until another matrimonial offense occurs." Then the paper would be raised and the record and the marital sin was still there.

Foods From South America.

The red pepper probably was used for food in South America a thousand years before the doctors of Europe in the sixteenth century took it up in a serious way as a remedy for various ills. The winter squash is found wild in Uruguay, a fact which is used to confound the botanists who believe that this Thanksgiving standby originated in the far East. Yankees think of the Hubbard squash as a delicacy eternally allied with New England, but its seeds have been found in the ancient tombs near Lima, tombs of Peruvians who died without ever having heard of the Mayflower or of Bunker Hill.

Making the Desert Cool.

An ingenious method which a thoughtful wife invented to keep her good man cool is described by J. Smeaton Chase in Travel Magazine. She sent down from town a quantity of canvas or burlap, which was to be strung on wires along the windward side of the veranda. The poor, panting man was to take his seat there, lightly arrayed, and spray water on the screen with a hose. The resulting evaporation would temper the breeze to a fair degree of comfort. The burlap and hose combination, it seems, plays a prominent part in California desert household economy.

The Bible.

I think that I know my Bible as few literary men know it. There is no book in the world like it; and the finest novels ever written fall far short in interest of any one of the stories it tells. Whatever strong situations I have in my books are not of my creation but are taken from the Bible. "The Deemster," is the story of the Prodigal Son. "The Bondman," is the story of Esau and Jacob. "The Scapegoat," is the story of Eli and his sons, but with Samuel as a little girl; and "The Manxman" is the story of David and Uriah—Hall Caine.

"My hat is in the ring!" exclaimed the energetic campaigner. "Friend," said Farmer Corntossel, "I'm gettin' just a little bit tired of bein' agitated and instructed. "I come of a large family. This settlement is full of my kin and I've got first an' second cousins scattered all over the state. When we hold a family powwow we control a whole lot of votes. So if I was you, I'd go an' get that hat out of the ring and stand around here with it in my hand."

The Most Important One.

A talented woman who is able to play on five instruments lost a reasonably good husband recently because the cooking stove is not one of those instruments.—Arkansas Gazette.

A Test in Stings.

Dutch wasps, says a news item, are very much like British. Only the finished expert can tell the difference on being stung.—Punch, London.

"That's Why We Chose a Columbia Grafonola"

When the neighbors call you'll be proud to show your Grafonola. No other phonograph has so many improvements that excite comment and admiration.

To the Columbia Grafonola's recognized superiority in richness of tone and beauty of design there has now been added the last touch of convenience in

The Only Non Set Automatic Stop

This long-wanted improvement is now a part of the new Columbia Grafonola. Built right into the motor. Invisible. Automatic. Operates on any record, long or short. Nothing to move or set or measure. Just start your Grafonola, and it plays and stops itself.

No other phonograph has it. No other phonograph can get it. Basic patents protect the *Columbia Non Set Automatic Stop.*

Ask the nearest Columbia dealer for a demonstration of the stop that needs no setting

Standard Models up to $300—Period Designs up to $2100

Fish Slippery Customers.

Almost every variety of fish is slippery and hard to hold when first caught. This is due to a sort of mucus exuded through the scales and is of the greatest importance to all slimy creatures. One of the important functions of the fish's slimy coating is to protect it from the attacks of fungus, a form of plant life found in all waters. If the fish is so injured that some spot becomes uncovered by slime, a barely visible fungus will be likely to lodge there, and when it is once lodged the process of reproduction is very rapid. It soon extends over the gills and kills the fish. The primary purpose of the slime of the fish is to reduce its friction when in motion through the water, and thereby increase its speed. It also serves as a cushion to the scales, which it thus protects from many injuries.

Lead On Your Stomach

That heavy, distressing feeling after meals that takes all the joy out of life never annoys the persons who take Dill's Digesters. No more indigestion, heartburn, biliousness, sour stomach—Dill's Digesters correct them all. All druggists sell them in vest-pocket bottles.

WHAT IS TRUTH?

Most of us today can sympathize with the old pagan, Pilate, who asked, "What is truth?"

Perhaps there were no professional propagandists in Pilate's time, as there are today, but he had heard many conflicting statements as to a matter that interested him and he was sorely perplexed.

Professional propagandists in recent months have befuddled the public as to a good many things of more or less vital concern. Every newspaper office is flooded with literature both pro and con on a variety of subjects.

What, for instance, is the truth as to conditions in Russia? We get conflicting reports, both evidently written by highly trained writers.

The same thing is true as to Czecho Slovakia and Jugo Slavia. Coming closer home, there is Mexico. How many men in this country know the actual truth as to conditions in the republic just to the south of us?

Conflicting interests, contending forces, are at work in all these countries, and each side gives out its own version of affairs. We do not know which is true, and perhaps we have not been given the truth at all.

Is it any wonder that as we finish reading the morning or evening paper we ask, like Pilate of old, "What is truth?"

WHO WAS TRUTHFUL

During the early days of Mr. Wilson's illness his physicians and the White House authorities constantly insisted that he was not seriously ill and not in any danger says the Manufacturer's Record. But Homer Cummings, as temporary chairman of the Democratic National convention at San Francisco made the statement in his address that for weeks Mr. Wilson was lying at the point of death. Somebody has been lying. Was it the doctors and the White House authorities or was it the temporary chairman of the Democratic convention? If the chairman was telling the truth, the doctors and the White House authorities committeed an unpardonable sin against the American people and against Mr. Wilson himself when they so persistently denied there was anything critical in his illness. If they told the truth, then Mr. Cummings committed a still greater crime against the American people when he used such a statement in order to denounce the opposite party.

The Seattle Post-Intelligencer reports the "making of moonshine booze out of macaroni, sphaghetti, vermicelli, potatoes, rice, raisins, rye, corn and a few other foods." This suggests the question why does nature lend itself so lavishly and variously to the production of an article tabooed by man?

It seems a pity for Hig Island—the greatest shipbuilding achievement the world has ever seen—to come to the end of its marvelous career. But it was called into being by the emergency of war and the need of its huge productive capacity has passed.

The former Crown Prince is said to want to come to the United States. Perhaps he thinks he could be as successful as his uncle, Prince Henry, was in creating enthusiasm for the imperial Germany among American citizens of German birth and parentage.

It is announced that both presidential nominees ran afoul of officers as Ohio boys, but just why this experience should better fit them to wear expensive shoes in the White House has not been made clear.

Sir Thomas Lipton was too genuine a sportsman to intimate that, though America keeps the cup, American yachtmen can't fill it and pass it from lip to lip in celebration of the victory.

Remember your dead. W. S. Cook and Co. Monuments with Lawrence Frye Funeral Director. 208tf

COURT REFUSED TO REDUCE BAIL

Judge McIlvaine, following argument in court on Monday refused to grant the motion of Attorney A. G. Braden, counsel for Jack Hogan, who is held in the Washington county jail for alleged participation in the Finleyville bank robbery, that the defendant be released under $3,000 bail. Hogan is at present held under $10,000 bail, which amount was fixed by Judge James I. Swanson, at the time the first application was made for bail. Attorney Braden stated that he would renew his offer for the reduction of bail, and it was suggested that the matter be taken up before Judge Brownson, who heard the original application.

District Attorney Cummins opposed any reduction in the bail. He said that originally the bank had insisted the bail be at least $50,000, which would not cover the amount the bank lost in money and securities. At that time the counsel for Hogan insisted that the bail be fixed at $5,000.

Attorney Braden made his motion on Monday for the reason that he had been informed that the case against Hogan would be presented before the sitting grand jury and consequently would not be tried at this term of court. He said that to require $10,000 bail meant that the defendant could not be released as he could not give that amount.

DOCTORS FAVOR NEW TASTELESS CASTOR OIL

New Process Makes Castor Oil Absolutely Tasteless.

Doctors have always prescribed castor oil when a real laxative is needed, and all mothers know how much trouble it is to get children to take it. There need be no more trouble for doctors are now recommending Kellogg's Tasteless Castor Oil, from which absolutely all nauseating taste has been removed. Children take it readily. They need not even know it is castor oil. This splendid new form of the good old family remedy is the result of a remarkable process perfected by the chemists of Spencer Kellogg & Sons, Inc. In strength and purity Kellogg's Tasteless Castor Oil is exactly the same as the old-fashioned disagreeable kind. Nothing has been removed but the taste. Do not accept substitutes, if you want a really tasteless castor oil. At all good druggists. Two sizes, 35 and 65c. (Advt.)

IS CHARGED WITH CUTTING A TRAIN

Information was made before Justice Fred J. Chalfant at Brownsville last Friday evening charging R. E. Long, a young man of Newell, with cutting a moving train in the Newell yards of the P. & L. E. railroad.

According to the information made about 9:45 Thursday morning when a freight train was pulling through the Newell yards, the accused had boarded the train further up the track. When near the Newell station he turned an angle cock on the air brake line, causing the train to come to a standstill in a few car lengths. Company officers were near and witnesses the incident and had Long arrested.

It seems there has been more or less trouble from the cutting of trains at that point for some time, by men said to be "outlaw" strikers, but who called themselves "walkout men." The employes of the company have been on watch for the violators.

At the hearing Friday evening Long was held in $1,000 bail to appear at the September term of the Fayette county court.

TAKEN TO PEN FOR VIOLATING PAROLE

Dr. Charles W. Lakel, of Fayette City, left Saturday in custody of Sheriff L. I. Shaw for the Western Penitentiary, to begin his sentence of from two to three years for violation of his parole. Dr. Lakel was sentenced before Judge VanSwearingen in the Fayette county court last week.

Dr. Lakel was paroled for four years last March when he pleaded no deense to shooting his sister-in-law. He had gone to the home of his mother-in-law for his wife and children, and shot through the door, the bullet striking his sister-in-law. One of the conditions of the parole was that he was to abstain from the use of any intoxicating liquor. Several weeks ago he caused considerable excitement at his home when he went home in an intoxicated condition, causing his wife to run from the house at midnight in her kimona. At the hearing he was not placed on the witness stand. His wife admitted that he had been under the influence of liquor, but denied that he had struck her as two witnesses had testified. Mrs. Lakel visited her husband at the Fayette county jail on Monday prior to his leaving.

Charleroi friends of Mr. and Mrs. William Ford, of Philadelphia, have received word that they are now the proud parents of a son, William, Jr. who arrived recently. Mrs. Ford will be remembered as Miss Mary Tomlinson formerly of Charleroi.

Mr. and Mrs. Ben Harris and children have left for Wawasset Park, Wilmington, Del., for a visit.

I have several buyers for lots in Charleroi and Lock 4. If you wish to dispose of that lot quick, list with me. Clyde B. Cope, 315 McKean avenue. 56-tf

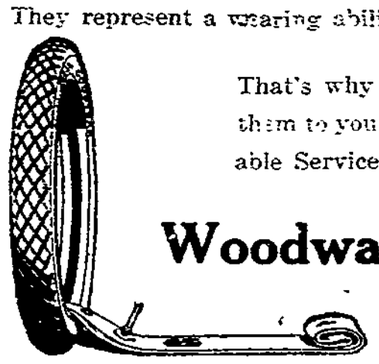
We Have Them

A complete stock of the famous Goodyear Clincher Fabric Tires for use on the Ford, Chevrolet, Dort, Maxwell and other small cars.

These dependable tires are the product of the largest tire factory in the world devoted to these sizes.

They represent a wearing ability that is unsurpassed.



That's why we carry them and offer them to you together with our dependable Service.

Woodward Garage

We Have Goodyear Heavy Tourist Tubes Too

AUGUST BLANKET SALE

Now is the time to prepare for the cool months that are to come Coal shortage and transportation difficulties make it advisable to prepare. Our high grade line of Cotton and Wool Blankets is complete and prices are lower now than they will be later. Every indication points to higher prices later so we urge you to buy now at the following prices:

COTTON

64 x 76 Grey	$3.00
66 x 80 Tan	$3.39
72 x 84 Grey	$3.59

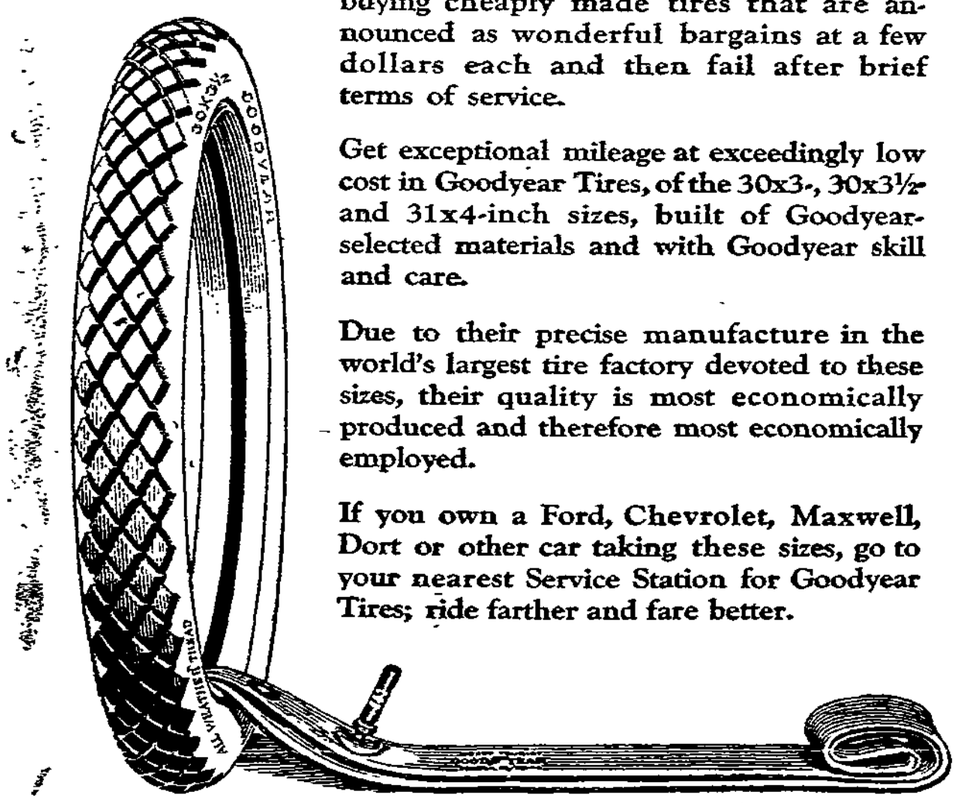
WOOL

70 x 82	$14.50
74 x 84	$18.00

NOTE: All Wool Blankets are strictly guaranteed all wool, both warp and filling.

Fau Dry Goods Co.

Goodyear Tires for Small Cars Are Popular Because Economical



There is nothing but disappointment in buying cheaply made tires that are announced as wonderful bargains at a few dollars each and then fail after brief terms of service.

Get exceptional mileage at exceedingly low cost in Goodyear Tires, of the 30x3-, 30x3½- and 31x4-inch sizes, built of Goodyear-selected materials and with Goodyear skill and care.

Due to their precise manufacture in the world's largest tire factory devoted to these sizes, their quality is most economically produced and therefore most economically employed.

If you own a Ford, Chevrolet, Maxwell, Dort or other car taking these sizes, go to your nearest Service Station for Goodyear Tires; ride farther and fare better.

30 x 3½ Goodyear Double-Cure Fabric, All-Weather Tread $23.50

30 x 3½ Goodyear Single-Cure Fabric, Anti-Skid Tread $21.50

Goodyear Heavy Tourist Tubes cost no more than the price you are asked to pay for tubes of less merit—why risk costly casings when such sure protection is available? 30 x 3½ size *in waterproof bag* $4.50

GOODYEAR

LOOKING TO SOUTH PACIFIC

White Men Planning Complete Possession of Fertile Islands of That Far-Away Ocean.

With Europe a seething mass of unrest and discontent and uncertainty, your Britisher is looking to the islands of the South Pacific, already owned by the empire, as the next place to go—and to exploit, to use the expression of a lot of people who do not know the meaning of the word. Already corporations are being formed to colonize the islands, and beautiful word pictures of the advantages of a residence upon them are being painted.

The truth is, for some years the white man has been gradually getting a foothold in the region. The delightful pictures which one sees of the natives, gives a little idea of what is really to be seen in the country. They are not the wild, naked people roaming at large, eating each other and the missionaries. Rubber plantations, coconut groves, phosphate mines and other industries are operated by Europeans. And schools and churches are encountered on every hand, with the honk of the horn of the motor bike heard in the shade of the palms.

The white man will not reach the end of his road until there is no more country to be settled up, and there are still vast areas to be brought under his domain. In Africa and upon the islands of the sea, he is setting his foot and clearing up the jungles and conquering the pests and becoming acclimated. But the end is not yet; there is still much to be done, and the chances are that the next few years will see an exodus to these far-away places where a beginning has already been made.—Columbus Dispatch.

MADE HIT WITH RECITATION

Prince's Speech Consisted of Verses From the Koran, but Audience Didn't Know It.

It is interesting to recall that during the recent European tour of Prince Feisal of the new kingdom of Syria, his memory of the Koranic verses stood him in good stead. In London, at a dinner in the Guildhall, the prince, who was the guest of honor, and who knew little French and less English, was called upon to reply to the toast of his health. Beside him sat his friend and mentor, Colonel Lawrence, Oxford professor and oriental scholar, to whom he whispered as he rose to acknowledge the lord mayor's speech. Colonel Lawrence nodded his assent, and the prince addressed his audience in flowing Arabic periods, winning appreciation and applause.

When the guest of honor had resumed his seat, Colonel Lawrence, as his interpreter, rose to express in English the prince's sentiments of gratitude for his reception, and to voice his devotion to the principles of democracy and allied solidarity. It was not until many days had gone by that Colonel Lawrence allowed it to be known among his friends that what the prince had whispered to him was:

"I'll recite the verses from the Koran about the cow."

Thus did the diplomatic professor deceive the unwitting ears of his Guildhall friends.—Munsey's Magazine

Country's Motive Energy.

The gauge of a nation's industrial might is the amount of motive energy which it can command for the manifold fields of production and the essential contributory activities. We have maintained our supremacy in manufactured output largely because of the vast amount of power which we could call into service. Robert G. Skerrett wrote in the Scientific American. Modern nations expend far more energy than the combined muscular ability of their population and beasts of burden. The margin is covered by the employment of mechanical energy in the form of power. To accomplish the work done annually in the United States, would require the labor of 3,000,000,000 hard-working slaves. The use of power gives to each man, woman and child in this country the service equivalent of thirty servants.

Visitors to the flower show held recently in the Royal Horticultural hall at Westminster, England, were surprised to find a number of rare orchids confined, like so many wild animals in the zoo, within a heavy wire cage. It was explained that as the flowers represented a new addition to the orchid family, the grower was naturally anxious that his fellow dealers should not share his triumph. Had it not been for the cage, an unscrupulous competitor might have stolen some of the powdery pollen from the blooms, and used it to fertilize plants of his own. Normally adhering to the bodies of visiting insects, the pollen might easily have adhered to the tip of the thief's finger.—Popular Mechanics Magazine.

United in Bonds of Peace

In the presence of the chief executives of Ecuador and Colombia, the corner stone of a monument commemorative of the happy termination of the boundary dispute between the two countries, was recently laid at the bridge of Rumichaca on the frontier. President Alfredo Maquerizo Moreno of Ecuador and President Fidel Suarez met half way on the bridge and greeted each other amid a salute of artillery and cheers of spectators of both nationalities. The presidents delivered addresses referring to the monument as a symbol of peace and friendship between their respective countries.

Where the Spike Went.

Answering a question as to what became of the gold spike that was driven into the last rail laid in building the Union Pacific railroad on its completion in 1869, a subscriber writes: "It was first photographed, and then melted up and recast into very small spikes about 15-16ths of an inch long, and they were distributed to the more prominent railroad men present. Among the recipients was my father, now deceased, from whom I received one of the photographs mentioned and a miniature gold spike. There are probably very few of these now in existence. The original spike was full size and engraved with the officers' names and titles. The miniature was engraved with the date May 10, 1869, and the words: 'Last spike of the Pacific Railway,' and 'Presented by D. Hewes.'"—Outlook.

Cheer Up and Gear Up.

It takes cheers and gears to make this old world go. The average man has so many things that hold him back that he is in danger of giving up. But the great men of the age are the product of trial. They come through the crucible tried and fire of life's obstacles because they have dared face the up-grades with a smile. Emerson says, "Nature, when she adds difficulties, adds brains." That may not seem to be true while we are under trial but the saying holds in the long run. And, besides brains, you must have a reasonable measure of good cheer. It's so easy to go down because there is nothing in the mind to add resistance to the constant tide of adversity. You must cheer up as well as gear up if you are going to win.

Famous Tyrian Purple.

Tyrian purple, the like of which the world has never seen, was so costly that it was used only by royalty, and hence comes the saying royal purple. The royal robes of ancient kings were dyed with Tyrian purple. This purple dye was extracted from a mollusk called the purple murex. It was found in tropical seas. It had thick shells covered with spines. It secreted a colorless liquid which when exposed to the atmosphere turned purple. History tells us that only a drop or so could be obtained from one mollusk hence its value. Needless to say there is no Tyrian purple from the "isles of Elishah" to be found in these days. When the glory of Tyre and Sidon passed Tyrian purple also passed away.

Accompanying.

One is most grateful to see from the circulars of the great schools of music, that the art of accompaniment is at last to receive that recognition which it has long been denied. How many teachers notice it in their work? Very few recognize its utility. They are all out to provide show pieces, or solos. Yet if you can put a song down before a player feeling that he will do justice to it, and thereby help the singer, the value of such skill is much greater than the ability to play a solo: and if you can transpose, a tone up or down, your earning equipment in the musical world is greatly increased. For general purposes this branch of music is the most useful of all.—Exchange.

Priceless Relics Destroyed.

Many almost priceless relics from the White House during its occupancy by President Harrison and bequeathed to Mrs. Lillie Eaton, a direct descendant of the late chief executive, were destroyed recently when lightning struck the Eaton home, near the Harrison tomb, and burned it to the ground. Several pieces of mahogany furniture, paintings antique candlesticks and china, laces, linen and jewelry, vast land grants for much Ohio valley territory and other documents of great historical value were destroyed, as were letters by Presidents James Buchanan, Andrew Johnson, John Tyler and Rutherford B. Hayes and by Daniel Webster.

Volcanoes are enormous producers of glass, derived (just as we get it) from the melting of quartz rocks. It is a right good quality of glass, too, though black as ink. In pre-Columbian days the aborigines of Mexico and Central America used it for razors and other implements. Our own Indians found it valuable for arrowheads, immense deposits of it being found in the far West. Sulphur, which is so indispensable for a great variety of purposes, is exclusively a volcanic product. Likewise gypsum, which, in the form of plaster of paris, is a necessity to sculptors, makers of casts and many other industrial workers. Pumicestone, derived from volcanoes, is used in various arts and crafts.

Why Londoners Rise Late.

There is one point in defense of London's dislike of early rising, writes a correspondent of the London Chronicle. It is largely a matter of geography, and Greenwich time has a real business value. It enables the Londoner in his working hours to be in touch with more than half the world on the same day. When he gets down to his office in the city at 10 a. m. the business man has the afternoon prices from Bombay or even from Pekin, on the one hand, and before he returns home for dinner he has learned the morning news of the American markets. The New Yorker has to rise early, for even when he opens 'change at 8 a. m. it is already afternoon in London.

PLAYED FEW "SAFETY SHOTS"

Men Who Have Won Success in Life's Game Satisfied With Nothing but Victory.

Walter Hagen, the golfer, says: "Never play for a safety, but always try for the cup."

Kings in other trades as well as in golf have found that it pays to "try for the cup," remarks "Girard" in the Philadelphia Press.

Safety shots are often careless shots in business as in play.

Rockefeller played six hole out in the oil world and he made a par and then some.

Morgan hammered the ball straight for the flag and it flew above every bunker and sand pit in the financial world.

Col. "Tom" Scott had no safety shots in his bag when dreaming out the Pennsylvania road system, nor did Franklin B. Gowen when he made his master stroke in buying the Reading's coal lands.

Theodore N. Vail, the telephone giant, never minced his game nor resorted to a half shot to save his face. He went out with the long stroke and came home to the final shot with a record card to his credit.

The big-league teams play to win the game, not to win a compromise or tie the other team.

The great merchant nails his flag to the mast, says "damn the torpedoes," and shoots straight at his target.

So in business as on the links the adage should be: "Hold your head still and play for the cup."

PICK EMPLOYEES WITH CARE

Modern Business Men No Longer Rely on the "Hit-or-Miss" Method of Selection.

There was a time when picking employees was a hit-and-miss job, a trial-and-error matter which few employers believed could be corrected. This is the day of doing things right and the modern employer is now selecting his associates, from the office boy to the man highest up, with as much care as he would launch on an entirely new business venture. William Marvin Jackson, director of the Personnel Development service, writes:

"If employees are carefully selected, with an eye to their real adaptability and fitness for the work to be done, it goes without question that they are much more likely to take an interest in their work, and hence, the business itself. If they are interested, they will get along well with their fellows and co-operate with their superiors. All of which means that they will grow, and there is no satisfaction for the employee greater than that which accompanies the knowledge that he is getting somewhere. Patting him on the back may make him feel good, and paying him a good salary may make him work harder. But giving him a new job and bigger job will alone make him supremely happy, will alone make him work with complete abandon, with thorough-going enthusiasm."—Forbes Magazine.

No Doubt Who Was Boss.

Sometimes it is easy to see, even before a couple is married, just which one is going to be the boss of the household. Recently a big, robust woman stepped into the office of Register of Deeds Adler Johnson. "Is this where I get a license?" she asked.

"What kind of a license?" asked Adler.

"A marriage license," said the woman.

"No, we don't handle them," said Adler. "Go to the first door down the hall on your right."

"I knew at first that this wasn't the place," said the big woman, with an air of disgust; "that's what I told him." Thereupon she stepped into the hall, and when the door opened Adler could see a little man waiting outside.

It was evident that the woman had usurped command and was going to take charge of the marriage license business, not to mention, of course, the honeymoon and all the rest of the alliance.—Fort Scott (Kan.) Tribune.

Rabbits have been doing great damage in the grazing districts of Australia, and strenuous efforts to eradicate them has resulted in the killing of a vast number of these animals. Some 100,000 bodies are now in cold storage awaiting shipment to England. The embargo on the export of rabbit skins was removed in December last, and the boom in rabbit-skin prices has produced remarkable competition in slaughtering the pest. The ruling average price paid to trappers for skins is now $1.82 per pound, and the demand for skins by the United States and European markets is so great that it cannot be satisfied, and it is thought that prices will go still higher. Experienced trappers are making up to $97 per week for the skins alone.

Wanted a Quantity.

Helen's mother came from a large family and Helen loved to visit her grandma's house, as there were always so many young uncles and aunts to play with. One day, after returning from one of her visits, Helen was taken to the bedroom and was shown a tiny new baby sister. Helen did not seem to be at all enthusiastic, and her father, surprised at her lack of interest, asked:

"Well, what do you think of your new baby sister?"

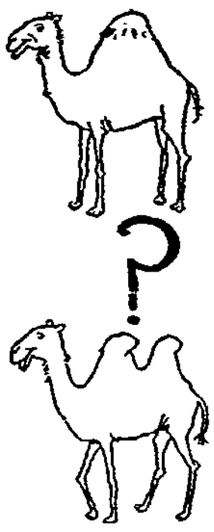
Helen replied: "Hm! Only one? Why didn't you get a real many, like grandma has?"

—and—would you listen to this!

Atlantic City
Saturday Noon

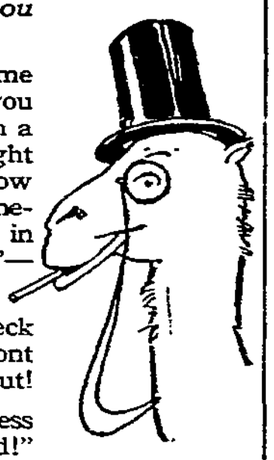
PETEY BOY!

Just a night flash by fast mail to uncork you a real fuss-stirring idea that has five aces shaded!



Now, bolt this down:—no two people, unless they run a circus or write encyclopedias, ever agree offhand on which is a camel and which is a dromedary when you line the two up and check off one hump on one and two humps on the other. *You can't do it with the sun shining!*

Spill this "hump" question first time you're in a bunch of live ones—if you want to see fur fly! Never heard such a wind-jamming squall in my life as tonight when I passed it to our crowd! You know Betty Ellen Jones. Well, she said a dromedary was a he-camel hunting a date in the desert! And, Betty's "Vassar, '20"—rah, rah! All right, Betty!



All you've got to do is dig out your deck of Camel cigarettes. That "bird" out front clinches the argument—*apparently*—but!

In the classic language of bigger business circles—"you tell 'em Cricket, Katy did!"

Report your luck quick. Try it on old Jig Jones! And listen, Peter. I'll shortly slip you some smoke news that'll make Jake's ideas rattle like a tin can tied to a towser dog's tail! *S'long!*

Yours for warm socks next winter!

Shorty.

Fashion Traced to Moreau.

The nick in a coat has been a puzzler to many. It is said to date back to the time of Napoleon. A general named Moreau had many followers, but they were afraid to openly express sympathy with him. It was therefore agreed to put a nick on their coats as a secret sign. The letter M can be seen in the lapel representing the initial letter of the general's name.

There are plenty of sea serpents, and of all snakes they are the most venomous. In tropical waters they are vastly numerous, especially in the Indian ocean, where they are often seen literally by hundreds, swimming at the surface of the water. They are six to eight feet long, very fierce and will commonly attack human beings. Their bodies are flat, and almost wholly filled by the lungs.

The Lock No. 4 Schools will begin 1920-21 term on September 6th 9 a. m. Room No. 1 and 2 will have half day sessions. Room No. 2 9 a. m. to 12 m. Room No. 1 1 p. m. to 4 p. m. Aug 10-18-27-S-3

They Don't Need Much Sugar

Old fashioned housewives canned by the open kettle method, and required a great deal of sugar to keep the fruit. When sugar was scarce or high they canned very little.

The scarcity of sugar this year is making little difference in canning. The cold pack methot not only makes vegetable canning safe and advantageous, but it permits fruit canning to be done in a very light syrup. With our equipment, fruits may be safely canned without sugar.

We have all sizes Jars, Covers, Good Luck Jar Rings, Wrenches, Wax, Ladles, Funnels, Tops, Sieves and Strainers, Handy Jelly Bag or Strainer with table attachment; wood spoons, enamel, aluminum, tinned Basting Spoons, all sizes; Fruit Jar Racks, used in the wash boiler, Handy Fruit Jar Holders. Everything you will need for canning fruits and vegetables.

DOCTORS PUZZLED; IRONTON MAN UNABLE TO SLEEP

Frank Shafer, of North Second Street, Ironton, Ohio, Couldn't Sleep; He's O.K. Now, Thanks To Reese Formula R-11

In a letter to The Reese Formula Co., Frank Shafer of North 2nd St., Ironton, Ohio, tells of his efforts to get relief from stomach trouble and the wonderful results obtained by using The Reese Formula R-11.

"I have suffered for a long time from what seemed to be a lump in the pit of my stomach. I was bilious, nervous and couldn't sleep at night. I tried several doctors and about every remedy on the market without relief. Hearing of The Reese Formula R-11 I secured a bottle and, although I have not yet finished the first bottle, my stomach trouble has disappeared. I feel fine and have slept like a top for the last three nights, something I haven't done for months. I am recommending The Reese Formula R-11 to all my friends for it is positively the greatest stomach, liver and kidney remedy I know of."

If you wish further information, write direct to our Medical Adviser, Medical Department, The Reese Formula Co., Huntington, W. Va.

HENNINGS DRUG STORE

THIN PEOPLE SHOULD TAKE PHOSPHATE

Says Nothing Like Plain Argo-Phosphate to put on Firm, Solid, Etay There Flesh and Muscle and Increase Strength, Vim, Vigor and Nerve Force.

Physicians claim there is nothing that will increase weight, strength and endurance like organic phosphate commonly known by druggists as argo-phosphate, it is inexpensive and is sold by all leading druggists everywhere under a guarantee to give satisfaction or money refunded. Weakness and thinness are usually due to starved nervous conditions.

Our bodies need more phosphates than are contained in the foods we eat.

If you wish a more rounded figure and plump well-developed arms, neck and bust in place of hollows you should simply take plain argo-phosphate as it builds up and restores run-down nervous conditions by phosphatizing the system. It transforms the appearance and an increase in weight is often times quickly produced.

The increase in weight also aids in improving the general health. Sleeplessness, nervousness, lack of energy and ambition quickly disapear.

Pale cheeks are changed to rosy ones and dull eyes become bright.

Miss Lena Brown of Atlanta, Ga., who only weighed 90 pounds reports that she gained 10 pounds in two weeks time and says argo-phosphate has made a different person of her and she has never felt better in her life.

SPECIAL NOTICE:—Owing to the fact that so many physicians and druggists are recommending argo-phosphate for relieving all nervous, worn-out deiblitated conditions and the unusually large sale of argo-phosphate there will be found in the market numerous substitutes for the genuine article. All imitations are inferior preparations and owing to its unusual flesh producing qualities itshould not be used by any one unless they desire to put on flesh and increase in weight.

Dispensed by Piper's Pharmacy.

Bell Phone 9087, California, Mrs. F. F. Lindberg, manicuring, shampoo and facial massage. Make appointments. Will call at your home. 34-tf

HONEYMOONS IN ODD PLACES

Persons of Adventurous Disposition Have Spent Them Amid Arctic and Savage Dangers.

Mr. Elkins, the wealthy young American who recently took his bride for a honeymoon "as near the North pole as he can comfortably get," is by no means the first bridegroom who has spent his "month of honey" in this chilly environment, says London Answers.

A few years ago Mr. Max Fleischmann, a Chicago millionaire, at his bride's request, took her straight from the altar to the Arctic wastes, where they spent, on their own evidence, "delightful" months, hunting seals, reindeer and polar bears, two of which fell to the bride's own gun. Mrs. Fleischmann's honeymoon wardrobe, we are told, consisted of an assortment of sheepskin dresses, lined with leather.

Less chilly, but no less adventurous, was the honeymoon journey of Major Powell-Cotton, who took his bride on a long and hazardous journey through Africa, spending many months in the heart of the Ituri forest, hunting the okapi and making friends of the savage pigmies, who had never before even seen a white woman.

But the most daring and adventurous of all recorded honeymoons was that of Captain Andrews, an American sailor, and his bride, who started to cross the Atlantic in a "cockleshell," 12 feet long, and were never seen again.

INDIAN IDEA OF RECKONING

Time Designated in Simple Fashion—Journeys and Distances Told Off by "Sleeps."

The American Indians of early days reckoned time by what they called "sleeps" and "moons." The Indian's "sleep" referred to a nineteen day of 24 hours and his "moon" to what the white man roughly and improperly calls a month. The Indians indicated the noon hour by pointing vertically upward. To indicate the middle of the first half of the daylight period—9 o'clock—he pointed upward midway between the horizon and the zenith and to indicate mid-afternoon — 3 o'clock—he pointed toward the opposite quarter. He spoke of the eastern horizon as "sunrise" and of the western horizon as "sunset."

Journeys and distances between different points were measured in "sleeps." Thus, when he undertook to tell how far he had traveled or to tell how far one point was from another, the old-time Indian would say a certain number of "sleeps." Ordinarily, a "sleep" in this sense corresponded to something like 35 miles—the distance a man could cover in a day, traveling at an ordinary pace on foot. However, it was not unusual for men carrying important messages to make twice 35 miles or more in a single 24 hour period.

New York Landmarks Going.

The "downtown" section of New York is losing one of its landmarks by the demolition of the Eastern hotel to make room for an office building. For nearly a hundred years it has been the favorite hostelry of American seafaring folk. "Dynamite Johnny" O'Brien, well-known for his practice of shipping arms to the Latin-American countries, concocted many of his filibustering schemes in this hotel, which he made his headquarters.

One of the features of this building was its beams of solid mahogany. In 1822, when it was constructed, cargoes of supplies were frequently shipped from New York to South American ports, and when a return cargo could not be secured mahogany was brought back, serving the purpose of both cargo and ballast. These cargoes were sold cheaply, and were often used in the construction of New York buildings of that period.

A Heavy Exit.

I had had a misunderstanding with my employer, and when I handed in my resignation I told him in very plain English what I thought of him; he, also, pointing out a few faults he thought I had. A few months later, after answering a blind ad for a position, I received a reply naming a time for an appointment. My name at that time being an exceedingly common one, it was not recognized; neither did I recognize him, as he had moved his office and changed the firm name. Upon being ushered into the office I met my former employer face to face. We were both speechless, and I did not catch my breath until I had backed out and was in an elevator going down.—Chicago Tribune.

Buenos Aires has no cafeterias for women and only one in a modified form for men. The first one for girls in the city is soon to be opened by the Y. W. C. A. The only steam table in Buenos Aires was discovered by Y. W. C. A. secretaries in the storeroom of a gas company. It had been sent from England for a food exposition and never used after that. It is now installed in the Y. W. C. A. The cafeteria when opened promises to draw a crowd for more than the usual reason.

It Did.

"My dear sir," said the salesman, courteously, as he handed his customer his package and no change, "you will find that your suit will wear like iron."

And sure enough it did. The man hadn't worn it two months when it began to look rusty.—New York Central Magazine.

Intellect and Feelings.

Every conscious creature is interested in and pays attention to particular objects to the exclusion of others. These objects are selected from the environment and constitute for each individual its phenomenal world par excellence. Such objects are so many stimuli to action. They arouse states of feeling—sensations, appetites, emotions—which lead to definite motor responses in relation to the perceived object. The feelings thus experienced play the part of psychic motors, and so far as the relation of the creative to its environment is consciously determined, it is essentially through their mediation. This is true both of the lower animals and of man himself, for the purpose of the intellect is to give effect to the feelings. Alike in the highest and lowest conscious organisms, the feelings are the springs of consciously directed activity.

Wild Country Has Attractions.

Giant condors guard the rocky peaks of the lofty Sierras, while crows and ravens patrol the llanos to see that no dead creature is left to infect the purity of the air. In the most forsaken wilderness of the land the traveler is cheered by the sweet notes of the nightingale, the mocking bird and the brilliant cardinal. Wolves have died off and there are no bears, but several varieties of wildcats, two varieties of native lions and two of foxes are found. There are also coyotes, a few antelopes, burro-deer about the Colorado river, a few ordinary California deer and a species of dark mountain sheep. There are ducks, geese and snipe without limit and three varieties each of quail and doves. There are rattlesnakes, of course, and no limit to the species and number of the insects.

Peculiar Streams.

Many of the streams and lakes of eastern Oregon are strongly alkaline in character. The Rio de Vinagre—the Vinegar river—of New Granada, in Central America, is sour from the sulphuric acid in the water. The Orange river in South Africa contains matter which renders it poisonous to fishes in part of its course. In Algeria there is a stream inky black, and indeed it is only diluted ink, owing to one of its tributaries being strongly impregnated with the iron which it absorbs from a ferruginous soil, and the other from meandering through a peat marsh, being equally rich in gallic acid, the two principal ingredients of ink.

Prefer Egg-Shaped Head.

Not many years ago ethnologists who saw some egg-shaped skulls brought from Malekula Island in the south Pacific held high hopes that they had found the missing link between monkey and man. Investigation soon disproved this theory. The cone-shaped heads of the Malekulans is a deformity deliberately produced by wrapping cord about the heads of babies. If the child survives its egg-shaped head, pointing upward, is a distinction akin to the tiny foot of the Chinese woman. Malekula is one of the larger islands of the New Hebrides group, which lie about 1,200 miles northward of Sydney, Australia.

Six-Inch Hawser Only 2 Inches.

When you read that a vessel is moored to her pier by a six-inch or an eight-inch hawser you must not think that the hawser is six or eight inches in diameter. Such a size would make a hefty rope, too heavy for handling, the New York Sun explains. Hawsers, unlike other ropes or cables, are measured according to their circumferences, not according to their diameters. Therefore, a six-inch hawser means one that is six inches around, not six inches in diameter, since the circumference of a circle is to its diameter as three and one-seventh is to one.

Health Rules.

Simple rules of health, not too hard to remember, may be reduced to a few brief instructions: Keep serene; use moderation in work, play, rest and sleep; ventilate every occupied room; seek out-of-door occupation and recreations; drink sufficient water; walk, stand and sit erect; breathe deeply, wear light, porous clothing; eat slowly, avoid overeating, eat sparingly of eggs and meats, and eat some raw foods, some bulky and some hard foods.

If you wish to be miserable, think about yourself, about what you want, what you like, what respect people ought to pay to you; and then to you nothing will be put. You will spoil everything you touch; you will make misery for yourself out of everything which God sends you; you will be as wretched as you choose.—Charles Kingsley.

The "Fourth Estate."

The expression the Fourth Estate is defined as follows: "The newspaper press; so designated humorously as a distinct power in the state; formerly, also, the persons constituting the lowest and unrepresented classes of society, as distinguished from the commons."

Practice and Words.

Tsze Kung asked: Who is a superior man? Confucius replied he who first practices his words and then speaks accordingly.—Chinese Classics, translated by Rev. David Collie.

Treasures In Royal Library.

The library at Windsor castle comprises among its 120,000 volumes some notable treasures. There is a row of Caxton's including the only perfect copy still existing of his "Aesop's Fables," and two Bibles, both with precious associations, though of a different order. One is the Bible which Martin Luther used to carry in his pocket and the other was taken by Charles I to the scaffold. There is a Koran, too, on the fly-leaf of which is inscribed: "From the library of the late Tippoo Sultaun of Mysore." This Koran belonged to the late Emperor Aurungzebe and was purchased by that prince for the sum of 9,000 guineas. Another interesting shelf is that containing the holograph records of parliamentary proceedings furnished by each successive prime minister since 1837 for the exclusive information of the sovereign.

Koreans as Inventors.

"A Korean invented the potter's wheel and Korean potters discovered the art of underglazing," says Mr. Duncan. "The present emperor of Japan drinks his tea from the first examples of Korean pottery. Koreans first sent musical instruments into Japan. There were brass and bronze factories there at the beginning of the Christian era. The great bell of Silla is the same size as the great bell at Moscow, but was cast 11 centuries before it. There is a tradition, and evidence to support it, that Korean engineers planned and built the Great Wall of China for Emperor Chin. Count Okuma gives credit to the Koreans for the introduction into Japan of the art of weaving silk and of carpentry and architecture."

Photoplay of Success.

To be forceful and magnetic, says Roger W. Babson, world-famous statistician, you must have faith in yourself without conceit. You can't expect others to have confidence in you, if you have no confidence in yourself. You can't expect others to follow you unless they know you are unselfish and sane. Know your real self, which is your best self and a part of God. Be your real self at all times and don't try to ape some one else, however attractive. You can be just as attractive and more so, if you will have faith in your own soul. Awaken self-knowledge, self-reliance and self-control. Hold your head high and go courageously forth like a conqueror.

Improved on Nature.

For a great many years graphite used in making lead pencils was obtained almost exclusively from mines in Cumberland. When the best quality was exhausted (early in the nineteenth century) the manufacturers turned their attention to the utilization of the accumulations of waste from cuttings of the original masses which they finely ground and mixed with varying proportions of clay. In this way they were able to produce pencils of 14 degrees of hardness and softness, making them superior to those formerly made from the entire graphite, which was never uniform in hardness and color.

What Are Your Enjoyments?

A person's tastes and mental timber are chiefly discernible, so it has been declared, in his manner of passing his leisure time. We assert ourselves unmistakably, that is to say, in our choice of enjoyments. Enjoyment, says the New York Telegram, enters somewhat into our work, at least so it is to be hoped, for it is even necessary to its efficient execution, but there is rarely the same opportunity for freedom of election and selection in our work as in our play. Our recreation hours may be mortgaged to some extent, but in the last resort we generally do with them what we wish to, what our strongest tastes and desires compel.

Hymns In the Orient.

The use of Christian hymns is causing a revolution in the music of the orient, according to reports received from American missionaries. The squeaky notes of the average Chinese and Japanese orchestra band are giving place to the strains of "Rock of Ages," and "Onward Christian Soldier," the Interchurch World Movement learns. Growing popularity of occidental hymns is similarly found in India. The recent coronation procession of a maharajah in that country marched to the stirring strains of Christian gospel hymns played by the potentate's brass band.

Down in southern Oklahoma, after the cotton crops are laid by, it is the custom of the colored population to hold big camp meetings. At one of these the minister was talking of the great joys of heaven. One of the brethren became very much excited and began shouting: "Praise de Lawd! Praise de Lawd! How I does wish I'se a June bug! I'd spread my wings and fly away to heaven." At this one of the sisters sprang up and said: "Why, Bruddah Mose, one of dem woodpeckers would be sho to git yo' on the way."—New York Evening Post.

Charles V Had Faith in Women.

The famous emperor Charles V, who was accounted one of the ablest rulers of his time, had such confidence in the ability of women to govern that he appointed three successively as regents of the Netherlands.

Foot Expert Here

A specialist from Chicago loaned to this store by

Dr. Wm. M. Scholl

the recognized foot authority, is here now.

foot bothered people should lose no time in coming to see him.

Examination and Advice Absolutely FREE

This expert knows all about feet. He knows the famous Dr. Scholl methods of correction and he knows that

There is a **Dr Scholl** *Appliance or Remedy for Every Foot Trouble*

Let him examine your foot and tell you what is the trouble, the cause and the way to quickly correct it. Let him demonstrate on your own foot that you can gain

Foot Comfort

immediately. You don't have to wear "freaky" or loose shoes. The Dr. Scholl plan is to give foot comfort while you wear the stylish, well fitting shoes you like.
